DISCUSSION: For many years, Stanislaus County has regulated the location of private swimming pools through use of the Uniform Building Code (UBC). Swimming pools were not interpreted as being "structures" for the purpose of requiring setbacks from front, side or rear property lines, or from other structures on the property on which they have been built. As a result, countless pools have been constructed throughout the unincorporated area without the yard provisions of the County Zoning Ordinance being applied to them.

In general, swimming pools have been required by the Department of Development Services, with concurrence of the Planning Department, to be constructed no closer than three feet from a property line in compliance with the Uniform Building Code. The side and rear yard setbacks in residential zones required to be five feet. The zoning ordinance does not address swimming pools. As a result, for many years they were not considered as being structures subject to normal building setback requirements. The only setbacks requirements imposed on pools were those in the UBC.

Staff has determined that, in the best interests of providing consistency and appropriate information to the public regarding this issue that an ordinance amendment to clarify any uncertainty is appropriate. The proposed language (attached) creates a specific definition of swimming pools, ensures that they will be constructed in a safe and appropriate manner consistent with all requirements of the Uniform Building Code as well.
