Approval to Authorize the Director of Parks and Recreation to Execute a New Grazing Lease with Larry A Byrd for 694 Acres of Non-Irrigated Rolling Hills Adjacent to Modesto Reservoir

DISCUSSION:

Stanislaus County owns 694 acres of grazing land that partially surrounds Modesto Reservoir. For many years, the County has leased out this property for cattle grazing purposes. In 1994, Modesto Irrigation District (MID) completed the construction of a Water Treatment Plant at Modesto Reservoir to supply domestic drinking water for the City of Modesto. Since that time, MID has regularly indicated concern over the quality of the water that supplies the Water Treatment Plant and one of the concerns is the impact on water quality from contact with cattle grazing on land next to Modesto Reservoir.

Stanislaus County entered into an agreement with Larry A. Byrd to lease real property for cattle grazing adjacent to Modesto Reservoir on July 1, 2003 for \$25/acre. This agreement was for five (5) years with the option to renew for an additional five (5) years. In this lease, one of the conditions was for the lessee (Larry A. Byrd) to participate in a Water Shed Study that was conducted by the University of California, Davis. The purpose of this study was to gather data concerning *Cryptosporidium* in cattle, in relation to domestic watersheds. The lease agreement also stipulated that the lessee must modify grazing procedures depending on the needs of the researchers.

On September 4, 2007, the study was completed and resulted in a document titled, "Best Management Practices For Cattle Grazing on Modesto Reservoir." This document describes the Best Management Practices (BMP) required to help keep *Cryptosporidium* from entering into the domestic water supply at Modesto Reservoir. Due to the BMP that have been identified in this study, both County and MID staff felt it was in the best interest of the domestic water supply for the City of Modesto and the County to develop a new lease agreement with these BMP included rather than extending the existing lease through exercising the option for an additional five years.

During the study, Mr. Byrd was a willing participant and modified many of his normal management practices that are common with cattle operations in this area. Some of these modifications are prohibiting calves fewer than 4 months of age between September 1 and February 1 and limiting calving time to the spring season. In addition, the calving interval has been shortened to just ninety (90) days from February 1 to April 1. The study required Mr. Byrd to provide supplemental feeders to draw cattle away from the waters edge and to provide drinking water stations in locations that will keep the cattle from having to drink from or gather close to the reservoir. Due to the costs of the BMP above the price was negotiated at the current level of \$25/acre.

These modifications have resulted in significant expenses such as 11% of the cows not having calves. He is also required to pay for the supplemental feeding stations, which has increased his expenses to operate. Mr. Byrd has installed a watering system to provide stations in remote locations of the grazing pasture. He has worked with the United States Department of Agriculture National Resource Conservation Service and professional rangeland consultants to establish this in an area that has no electricity or operating water wells—thus requiring a very expensive solar powered pump. The system also required a very extensive pipeline to transport the water to the remote locations away from the reservoir. The investment in time and money has made it very costly for him to continue to graze his cattle at Modesto Reservoir.

Approval to Authorize the Director of Parks and Recreation to Execute a New Grazing Lease with Larry A Byrd for 694 Acres of Non-Irrigated Rolling Hills Adjacent to Modesto Reservoir

Mr. Byrd has been a model lessee, a very good steward of the land, and a good neighbor with adjacent property owners. He also has a very good relationship with the Department of Parks and Recreation staff. For example, last year Mr. Byrd installed over 2 miles of new fencing between the County's property and a neighbor's almond orchard, which was worn out due to the age of the fence. Mr. Byrd also installed a cattle guard and fence to prevent cattle from entering the day use area of the reservoir due to the low water levels that MID is maintaining. The cattle can now cross in areas that have normally been under water during the summer months. Mr. Byrd has also taken it upon himself to help Department staff by removing dead cattle that have floated into the reservoir from other cattle operations and to inform them of problems at the recreation area when staff is not present. The Department staff can contact Mr. Byrd directly when issues require his attention. Due to his close proximity to the property, he usually responds in a very timely manner to their concerns.

If the proposed new Grazing Lease is not entered into, then the County will not have a legal way to make sure the Best Management Practices described in the Water Shed Study will be followed. MID and County staff have worked together to determine the terms of this proposed lease agreement. The domestic water supply for the City of Modesto, Park and Recreation areas, MID, and the neighboring property owners, make this a very sensitive property. Department staff acknowledges this as a situation requiring a special lease agreement with a special lessee.

POLICY ISSUE:

The Board of Supervisors should determine if executing a new Grazing Lease is consistent with the Board's priorities of a healthy community, a strong agricultural heritage and effective partnerships.

STAFFING IMPACT:

There are no staffing impacts associated with this item.
