RE: Document Submittal for the Public Record

Dear Stanislaus County Clerk of the Board,

We are a nonprofit research and dissemination organization. It is our goal to inform county representatives of Sustainable Development/Agenda 21. Have you ever heard of Sustainable Development or Agenda 21? Most have not.

Many officials unknowingly adopt policies and procedures that advance these directives in the name of protecting the environment, equity and economy. However many of these policies are designed to undermine the political recognition of unalienable rights. Often the International Council of Environmental Initiatives (ICLEI) directs local governments in this regard.

Enclosed is a copy of *Sustainable Development: Global to Local Action Plans*. Please enter this pamphlet into the public record and forward it to your county's elected representatives so that lack of awareness does not become the reason for implementing these policies.

Sincerely,

Michael Shaw
President

P.S. We are also available to discuss this issue in more detail with elected County Representatives either individually or through seminars and retreats.
