Approval to Award an Agreement between Stanley Convergent Security Solutions and the Sheriff's Department to Upgrade and Expand the Key Card Access Control System

DISCUSSION:

The Sheriff's Department is in need of an updated and expanded access control system for the Sheriff's Operation Center that houses Administration, Information Technology, Investigations, Patrol Operations, Property and Evidence and Records. The existing system is antiquated and inadequate for the current building safety needs, and the manufacturer is no longer providing support for this system.

The Sheriff's priority is to have a security system that is standardized with other County departments to avoid the need for issuing multiple cards for access to various County facilities and for more efficient authorization and tracking of an employee's allowable access and termination of access. The Lenel card key access system is the current system used by the County.

In April, 2013, the General Services Agency (GSA)-Purchasing Division prepared a Card Key Access Control bid document, #13-13-CB for the Sheriff's Department. The subject bid and pre-conference was canceled with a notice on Public Purchase that it would be re-issued at a later date. In August, 2013, bid document #13-20-CB was posted and GSA-Purchasing Division conducted an Invitation to Bidders to secure a vendor that could supply, install and warranty the Sheriff's Department with a Lenel card key access control system. Three vendors submitted bids, however, one was disqualified because they were late. The lowest bidder, Stanley Convergent Security Solutions, is recommended to be awarded the agreement.

The award of this agreement will provide the County with a secure, reliable access system that is compatible with the County integrated access system.

POLICY ISSUES:

Board approval is required to award this agreement. Approval of award of this agreement supports the Board's priority of Efficient Delivery of Public Services and A Safe Community.

STAFFING IMPACT:

There is no staffing impact associated with this request.
