Woodward Reservoir is located at 14528 26-Mile Road a few miles north of Oakdale off Hwy 120. This regional park offers 3,767 acres of land and 2,900 acres of reservoir for recreation and camping. Facilities include 115 developed campsites, 40 full hook-up campsites, undeveloped camping areas, marina, concessions, restrooms, picnic shelter, barbeques, picnic tables, and radio control airplane field.

Campsites are available on a “first-come first-serve basis”; no reservations are available at this time.

Campsites are located at:

- 32 Developed sites at Fischer Point
- 19 Developed sites at Charlie’s Point
- 40 Full hook-ups at Hackberry Flat
- 42 Developed sites at T Island
- 21 Developed sites at Muir Point
- Undeveloped camping is also available in designated areas.

Recreation opportunities include swimming, fishing, boating, water/jet skiing, waterfowl hunting (with permit), and radio control airplane flying.

In the near future, you can expect to see exciting changes when you visit Woodward Reservoir. Stanislaus County and the South San Joaquin Irrigation District are spending over \$1 million to improve existing campsites, picnic areas, and restrooms. More trees will be added to the landscape and additional developed campgrounds and day-use facilities will be built. Since water from Woodward Reservoir is now a source of drinking water for cities in our region, state and federal laws no longer allow camping in undeveloped campsites along the water line. As of November 1, 2004, camping in undeveloped campsites is prohibited within 30 feet of the high water mark.

On the Fourth of July, the festivities include our annual fireworks display. This is a busy day at the reservoir – come early and stay late for “fun in the sun and the stars”.

The RADIO CONTROL FLYERS UNLIMITED, INC. operates and maintains the radio control airplane landing field on the north side of the reservoir. The FLYERS strive to have the best flying field anywhere, including a paved landing strip and large shade shelter. As you visit the field you will see that there is a relaxed atmosphere with all types of pilots and flying machines. You will find that nobody cares what you fly as long as it is airworthy and safe. The FLYERS offer several events throughout the year in giant/mid-size aerobatics and float flying.

In the winter of 2005, the *Stanislaus County Fish and Wildlife Committee* and local hatcheries restocked the fish population at the reservoir. In addition to the traditional rainbow trout, red-ear sunfish, large mouth bass, channel catfish, and blue gill have been planted.

We have a great variety of wildlife here at the reservoir. You may see a number of different birds and mammals. You are very likely to come across the ground squirrels, jackrabbits, cottontails, red-tail hawks, coyotes, raccoons, seagulls, burrowing owls, geese, ducks, blue herons, great white egrets, and much, much more.

Sponsored By:

Stanislaus County Board of Supervisors - William O'Brien, District 1 • Vito Chiesa, District 2 • Jeff Grover, District 3 • Dick Monteith, District 4 • Jim DeMartini, District 5
