Stanislaus County Announces an Easier Way to Do Business.

Stanislaus County, CA – It just got easier to do business with Stanislaus County.

The Stanislaus County General Services Agency Purchasing Division now has a new vendor management system available on the web (www.stancounty.com/purchasing). This new system automatically emails registered vendors with notifications on new bid opportunities when they become available. The system also allows electronic bid submissions, something not previously available. Vendors only need to register once to receive notifications for both Stanislaus County and the City of Modesto.

“The County wants to continue bringing more services on-line for the community,” stated Julie Mefferd, the Director of the County’s General Services Agency. “The new vendor system makes it much easier for vendors to participate in the county bid process and to stay up-to-date on projects that might interest them.”

For more information and instruction on how to register as a vendor please visit www.stancounty.com/purchasing.
