CONTINUED

“The flu virus can be spread 24 hours before a person is aware that they are ill. Get a flu vaccine to protect others and those you love,” states Dr. John Walker, Stanislaus County Public Health Officer.

In addition to getting vaccinated, Public Health officials recommend everyone help prevent the spread of the flu by:

- Avoid touching your eyes, nose or mouth;
- Covering your coughs and sneezes with your sleeve or tissue;
- Washing your hands often. Carry hand sanitizer with you and use it when you are not able to wash your hands; and
- Staying home if you are sick.

Flu information can be found at the HSA website at www.hsahealth.org or by calling the flu information line at (209) 558-8872.
