County Center III

Open to all County
Employees
(With Supervisor or
Manager Approval)

Self Registration:
Using PeopleSoft on the
Intranet, select Self-
Service, learning and
development, and then
request training
enrollment.

Want to make better decisions at work and in life? Ever wondered about how your brain works through problems and comes to conclusions? Are you worried that unconscious biases are sabotaging your ability to make important decisions? Then Decision Making 101 is the course for you!

Decision Making 101 will explore the way humans interpret and draw conclusions about the world around them, make judgments about facts, and come to decisions. We will especially focus on how the way our brain works, how it can lead us to make mistakes and lead us to conclusions we would disagree with in hindsight. After covering our brains pitfalls, we will discuss the strategies we can utilize to avoid those mental hazards and ensure that we make quality decisions.

Trust us, taking this class is a great decision but come and find out for yourself!
