Value 0-50% - These are homes with values affordable to households with incomes at or below 50% of HUD Area Median Family Income. Affordable is defined as annual owner costs less than or equal to 30% of annual gross income. Annual owner costs are estimated assuming the cost of purchasing a home at the time of the Census based on the reported value of the home. Assuming a 7.9% interest rate and national averages for annual utility costs, taxes, and hazard and mortgage insurance, multiplying income times 2.9 represents the value of a home a person could afford to purchase. For example, a household with an annual gross income of \$30,000 is estimated to be able to afford an \$87,000 home without having total costs exceed 30% of their annual household income.

Value 50-80% - These are units with a current value that are affordable to households with incomes greater than 50% and less than or equal to 80% of HUD Area Median Family Income.

Value > 80% - These are units with a current value that are affordable to households with incomes above 80% of HUD Area Median Family Income.
