

## Geer Road at Whitmore Avenue Intersection Signalization

The Geer Road at Whitmore Avenue intersection is located in central Stanislaus County approximately 1.0 miles east of Santa Fe Avenue. It currently operates at a Level of Service “E” in the peak hour, which is defined in the California Highway Capacity Manual as an average user delay of greater than 35 seconds but less than 50 seconds for an unsignalized intersection. This intersection has an average delay of 36 seconds. The project is funded with a combination of Federal Congestion Mitigation and Air Quality (CMAQ) funds and County Public Facility Fees (PFF) funds.
