Thursday, May 17, 2018

4:00 p.m.

# Stanislaus County Public Works

## Program

### Master of Ceremonies

Matt Machado  
Stanislaus County  
Public Works Director

### Remarks Jody

Hayes Stanislaus  
County  
Chief Executive Officer

## The Project

The Morgan Road Administration Building & Vehicle Maintenance Building Project involves 9.5 acres of the 15-acre site and consists of:

A new Administration Building made of metal, wood, and concrete masonry unit (CMU) exterior walls with a shed roof. The building will house the administration staff of Public Works including finance, traffic, construction engineering, design engineering, and survey. This new building is 19,000 square feet.

A new Vehicle Maintenance Building that is a pre-manufactured metal building with CMU exterior walls and shed roof. The building will house the vehicle maintenance shop, and roads and shop staff in an administrative office space. This new building is a bit more than 30,000 square feet.

Additionally the project includes 20,000 square feet of new landscape and a covered plaza area for staff meetings and lunches, new utility connections for water and sewer, and 1,200 linear feet of frontage improvements on Morgan Road with minor road widening. Some innovative features include 70,000 square feet of a permeable paver parking lot, a secure map / vault room, collaboration space, good use of natural light, and heated floors in the vehicle maintenance shop.
