

Urban Pavement Preservation Project - Phase C

COMMUNITIES OF DEL RIO, DENAIR, AND COWAN TRACT

Contractor
Pavement Coatings Co.

Funding Source
Measure L
CalRecycle Grant

Construction Cost
\$2,495,500

About the Project

The Urban Pavement Preservation (UPP) Phase C project includes pavement preservation of residential streets in the areas of Del Rio, Denair and the Cowan Tract. Pavement treatments include asphalt-rubber chip seal and rapid setting slurry seal. Following the application of pavement treatment, streets will be re-stripped with thermoplastic. Construction is expected to be completed Summer 2020.

The asphalt-rubber chip seal construction was partially funded by a CalRecycle Grant. This project diverted an estimated total of 20,275 California waste tires from the waste stream.

Project Benefits

- Pavement Preservation
- Improved Rideability
- Improved Safety

Date: 06/02/2020
Project No. 9653

Hours

Monday - Friday
7:00 am - 5:00 pm
