# Executive Summary

---

This report summarizes an analysis of the need for public facilities and capital improvements to support future development within Stanislaus County through 2045. It is the County's intent that the costs representing future development's share of these facilities and improvements be imposed on that development in the form of a development impact fee, also known as a public facilities fee.

## Background and Study Objectives

The primary policy objective of a public facilities fee program is to ensure that new development pays the capital costs associated with growth. The primary purpose of this report is to calculate and present fees that will enable the County to expand its inventory of public facilities – and therefore maintain its facilities standards – as new development leads to service population increases.

The County imposes public facilities fees in unincorporated areas under authority granted by the *Mitigation Fee Act* (the *Act*), contained in *California Government Code Sections 66000 et seq.* This report provides the necessary findings required by the Act for adoption of the fees presented in the fee schedules contained herein. The County has existing agreements with the incorporated cities in the County to implement the impact fees.

## Fee Categories

The public facilities and improvements included in this analysis of the County's public facilities fee (PFF) program are divided into the fee categories listed below:

- Animal Services
- Behavioral Health
- Criminal Justice
- Detention
- Emergency Services
- Health
- Libraries
- Other County Facilities
- Parks
- Sheriff
- Regional Transportation (not updated at this time)
- Countywide Information Technology

## Use of Fee Revenues

Impact fee revenue must be spent on new facilities or expansion of current facilities to serve new development. Facilities can be generally defined as capital acquisition items with a useful life greater than five years. Impact fee revenue can be spent on the following capital facilities to serve new development: land acquisition, construction of buildings, new roadways, road expansions, vehicles, information technology, library collections, software licenses and equipment.

The County has a 20-year Capital Improvement Plan (CIP), from which projects are prioritized with a subset of approved and funded projects in a more specific five-year CIP. The County also has master facilities planning documents as required by law and publishes an auditor's report.

## Methodologies Used in This Study

For all categories *except* for the regional transportation impact fee (RTIF), this study uses the existing inventory method to calculate a cost standard that ensures that new development contributes to facilities at the same rate that existing development has contributed to date. This methodology is not based on a master plan for facilities. Rather, this methodology uses the County's existing inventory of facilities as of 2016 to calculate the existing facility standard serving existing development. A cost standard is used to combine disparate types of facilities, such as land, buildings, and vehicles, funded by the same public facility fee. By definition this methodology results in no facility deficiencies attributable to existing development.

The RTIF is not being updated at this time. The County expects that future revisions to the RTIF will be guided by StanCOG, with the participation of all member jurisdictions. The County expects to bring this fee to StanCOG for further analysis shortly after anticipated adoption of this 2018 PFF update.

## Fee Schedules

**Tables E.1, E.2 and E.3** summarize the schedules of maximum justified public facilities fees based on the analysis contained in this report.

**Table E.1: Stanislaus County Public Facilities Fee Summary - Unincorporated**

Land Use	Animal Services	Behavioral Health	Criminal Justice	Detention	Emergency Services	Health	Library	Other County Facilities	Regional Parks	Neighborhood Parks <sup>1</sup>	Sheriff <sup>1</sup>	County-wide IT	Existing RTIF	Admin Charge	Total Fee

<sup>3</sup> Charged as noted (per lane, per pump, per room or per acre), in addition to commercial fees (excluding RTIF).

# 1. Introduction

---

This report presents an analysis of the need for public facilities to accommodate new development in Stanislaus County. This chapter provides background for the study and explains the study approach under the following sections:

- Public facilities financing in California;
- Study objectives;
- Stanislaus County public facilities fee program;
- Study Methodology;
- Fee Program Maintenance; and
- Organization of the report.

## Public Facilities Financing in California

The changing fiscal landscape in California during the past 30 years has steadily undercut the financial capacity of local governments to fund infrastructure. Three dominant trends stand out:

- The passage of a string of tax limitation measures, starting with Proposition 13 in 1978 and continuing through the passage of Proposition 218 in 1996;
- Declining popular support for bond measures to finance infrastructure for the next generation of residents and businesses; and
- Steep reductions in federal and state assistance.

Faced with these trends, many cities and counties have had to adopt a policy of “growth pays its own way.” This policy shifts the burden of funding infrastructure expansion from existing rate and taxpayers onto new development. This funding shift has been accomplished primarily through the imposition of assessments, special taxes, and development impact fees also known as public facilities fees. Assessments and special taxes require approval of property owners and are appropriate when the funded facilities are directly related to the developing property. Development fees, on the other hand, are an appropriate funding source for facilities that benefit all development jurisdiction-wide. Development fees need only a majority vote of the legislative body for adoption.

## Study Objectives

The primary policy objective of a public facilities fee program is to ensure that new development pays the capital costs associated with growth. The primary purpose of this report is to calculate and present fees that will enable the County to expand its inventory of public facilities – and therefore maintain its facilities standards – as new development leads to increases in service demands.

The County imposes public facilities fees in unincorporated areas under authority granted by the *Mitigation Fee Act* (the *Act*), contained in *California Government Code* Sections 66000 *et seq.* This report provides the necessary findings required by the *Act* for adoption of the fees presented in the fee schedules contained herein. The County has agreements with the incorporated cities within the County to implement the County impact fees.

The County of Stanislaus is forecast to experience substantial growth in both incorporated cities and unincorporated areas through this study’s planning horizon of 2045. This growth will create an increase in demand for public services and the County facilities required to deliver them. Given the revenue challenges described above that are common to most cities and counties in

California; the County has decided to use a development impact fee program to ensure that new development funds the share of facility costs associated with growth. This report makes use of the most current available growth forecasts, facility plans, and engineering studies to ensure that the County's fee program is representative of the facility needs resulting from new development.

All fee-funded capital projects are programmed through the County's Capital Improvement Plan (CIP). Use of a CIP helps the County identify and direct its fee revenue to public facilities projects that will accommodate future growth. By programming fee revenues to specific capital projects, the County ensures a reasonable relationship between new development and the use of fee revenues as required by the *Mitigation Fee Act*.

## Stanislaus County Public Facilities Fee Program

This section provides a history of the Stanislaus County Public Facilities Fee (PFF) program. The program provides a substantial share of the total funding for the County's CIP.

### PFF Program Overview

The PFF program collects impact fees from new development throughout the County, both in cities and the unincorporated area, to fund the public facilities required to accommodate growth. The PFF program includes two types of impact fees:

- **Countywide fees** collected from new development both in cities and in the unincorporated area. Fee revenues fund public facilities that are the responsibility of the County to provide to all development countywide such as libraries and public health.
- **Unincorporated only fees** collected from new development only in the unincorporated area. Fee revenues fund public facilities that are the responsibility of the County to provide to development only in the unincorporated area such as sheriff patrol and neighborhood parks.

New development in cities only pays the countywide fees. New development in the unincorporated area pays both the countywide and unincorporated only fees.

The multi-jurisdictional strategy of the PFF program was unique at the time of initial adoption in 1990 and has served as a model for other counties throughout the State. The County's nine cities have agreements with the County to adopt, impose, collect and transfer to the County impact fees to fund facilities that are the responsibility of the County. These facilities include, for example, jails, libraries, regional parks, and regional roads. The County's PFF was the first impact fee program in California in which cities partnered with their county to fund the impact of new development on countywide public facilities. Since Stanislaus County pioneered this public facility funding strategy a number of counties have adopted or are currently considering this type of multi-jurisdictional fee program.<sup>1</sup>

Nearly all of the PFF program fees are based on a facility standard that represents the County's existing level of facilities and existing demand for services. Under this method, new development funds the expansion of facilities at the same facility standard currently serving existing development. This method results in no facility deficiencies attributable to existing development. The specific methods used to calculate the PFF program fees are described later in this chapter.

---

<sup>1</sup> Counties with similar adopted programs include Kings, Madera, Placer, Solano, and Yolo though participation by cities varies from county to county. Fresno, Kern, Shasta, and Tulare counties have initiated similar studies. A number of other counties such as Contra Costa, Riverside, Sacramento, San Bernardino, and San Joaquin and their constituent cities have adopted multijurisdictional impact fee programs focused solely on funding regional transportation improvements.

## 1990 – Initial Adoption

The PFF program was initially developed in 1989. The *Mitigation Fee Act* was first adopted in 1987 (AB 1600) and became effective on January 1, 1989. The County retained Recht Hausrath & Associates (now called Hausrath Economics Group) to evaluate the public facilities impacts of new development and develop the PFF program. The County adopted the initial fee schedule in 1990 based on a detailed analysis prepared by Recht Hausrath & Associates regarding the reasonable relationship (“nexus”) between growth and the need for additional public facilities.

## 1992 – Recession Adjustment

In 1992 the County reduced the fees in an effort to stimulate economic development in response to the severe recession at that time. During the same period the State diverted substantial shares of the County’s property tax to fund schools and reduce the impact of the recession on the State’s budget. The effects of the recession remained with the County through 1996. The fiscal impacts of these actions significantly constrained the County’s ability to fund expanded facilities to accommodate the rapid growth that returned by the end of the decade.

## 2003 – Comprehensive Update

In 2003 the County conducted a comprehensive update to the PFF program. The update included:

- Revising the facility inventory and service demand data to reflect existing facility standards as of 2003;
- Updating unit costs for public facilities to 2003;
- Adding a new public facility fee category for animal control, dividing the parks fee into regional parks and neighborhood parks categories, and re-programming the unincorporated area only fire fee to cover all emergency services countywide;
- In the fee schedules, disaggregating the Large Industrial land use type into more detailed land uses to more accurately reflect the lower employment densities of this type of development; and
- Adopting an automatic annual inflation adjustment to the fee schedules to reflect capital project cost inflation.

## 2005 – Inflation Update

The 2005 inflation update revised the 2003 PFF program fee schedules to 2005 using five separate cost inflation indexes depending on the type of public facility.

## 2010 – Comprehensive Update

In two separate efforts, the County comprehensive update of the PFF program, and the Regional Transportation Impact Fee (RTIF) by:

- Revising the facility inventory and service demand data to reflect existing facility standards as of 2008;
- Updating unit costs for public facilities to November, 2009;
- Updating RTIF project lists; and,
- Adding a new facility fee category for information technology.

## 2014 – Inflation Update

The 2014 inflation update revised the 2010 PFF program fee schedules to 2014 reappraised land values and separate inflation indices for buildings and equipment.

## 2018 – Comprehensive Update

The current study will provide a comprehensive update of the PFF program, excluding RTIF by:

- Revising the facility inventory and service demand data to reflect existing facility standards as of 2016;
- Updating unit costs for public facilities to 2016; and,
- Revising administrative guidelines as necessary.

The changes in the PFF program categories since adoption of the program in 1990 are summarized in **Table 1.1**.

## 2019 – Addition of Accessory Dwelling Unit Land Use Category

This revision adds the accessory dwelling unit land use category to the PFF program based on an assumption of 1.0 persons per dwelling unit. The fees for all existing land uses remain consistent with the 2018 Comprehensive PFF Update.

**Table 1.1: PFF Program Revisions**

1990	2003	2005	2008	2010	2014	2018

## Fee Program Maintenance

Once a fee program has been adopted it must be properly maintained to ensure that the revenue collected adequately funds the facilities needed by new development. Impact fee levels must be adjusted frequently to account for inflation. Should the cost of facilities rise more quickly than the fee amounts collected, the facilities needed to serve new development will be underfunded. To avoid collecting inadequate revenue, the inventories of existing facilities and costs for planned facilities must be updated periodically for inflation, and the fees recalculated to reflect the higher costs. The use of established indices for each facility included in the inventories (land, buildings, and equipment), such as the Engineering News Record, is necessary to accurately adjust the impact fees. For a list of recommended indices, and step-by-step instructions for adjusting fees for inflation, see Chapter 16.

While fee updates using inflation indices are appropriate for periodic updates to ensure that fee revenues keep up with increases in the costs of public facilities, it is recommended to conduct more extensive updates of the fee documentation and calculation (such as this study) when significant new data on growth forecasts and/or facility plans become available. For further detail on fee program implementation, see Chapter 16.

## Study Methodology

Public facilities fees are calculated to fund the cost of facilities required to accommodate growth. The five steps followed in a public facilities fee study include:

1. **Estimate existing development and future growth:** Identify a base year for existing development and a growth forecast that reflects increased demand for public facilities;
2. **Identify facility standards:** Determine the facility standards used to plan for new and expanded facilities;
3. **Determine facilities required to serve new development and their costs:** Estimate the total amount and cost of planned facilities, and identify the share required to accommodate new development;
4. **Calculate fee schedule:** Allocate facilities costs per unit of new development to calculate the public facilities fee schedule; and
5. **Identify alternative funding requirements:** Determine if any non-fee funding is required to complete projects.

The key public policy issue in development impact fee studies is the identification of facility standards (step #2, above). Facility standards document a reasonable relationship between new development and the need for new facilities. Standards ensure that new development does not fund deficiencies associated with existing development.

## Types of Facility Standards

There are three separate components of facility standards:

- ♦ *Demand standards* determine the amount of facilities required to accommodate growth, for example, park acres per thousand residents, square feet of library space per capita, or gallons of water per day. Demand standards may also reflect a level of service such as the vehicles-to-capacity (V/C) ratio used in traffic planning.
- ♦ *Design standards* determine how a facility should be designed to meet expected demand, for example, park improvement requirements and technology infrastructure for county office space. Design standards are typically not explicitly evaluated as part of an impact fee analysis but can have a significant impact on the cost of facilities.

Our approach incorporates current facility design standards into the fee program to reflect the increasing construction cost of public facilities.

- ♦ *Cost standards* are an alternate method for determining the amount of facilities required to accommodate growth based on facility costs per unit of demand. *Cost standards* are useful when demand standards were not explicitly developed for the facility planning process. *Cost standards* also enable different types of facilities to be analyzed based on a single measure (cost or value), useful when disparate facilities are funded by a single fee program. Examples include facility costs per capita, per vehicle trip, or cost per gallon of water per day.

## New Development Facility Needs and Costs

A number of approaches are used to identify facility needs and costs to serve new development. Often there is a two-step process: (1) identify total facility needs, and (2) allocate to new development its fair share of those needs.

There are three common methods for determining new development's fair share of planned facilities costs: the **existing inventory method**, the **system plan method**, and the **planned facilities method**. Often the method selected depends on the degree to which the community has engaged in comprehensive facility master planning to identify facility needs.

The formula used by each approach and the advantages and disadvantages of each method is summarized below:

### *Existing Inventory Method*

The existing inventory method allocates costs based on the ratio of existing facilities to demand from existing development as follows:

$$\frac{\text{Current Value of Existing Facilities}}{\text{Existing Development Demand}} = \$/\text{unit of demand}$$

Under this method, new development funds the expansion of facilities at the same standard currently serving existing development. By definition the existing inventory method results in no facility deficiencies attributable to existing development. This method is often used when a long-range plan for new facilities is not available. Only the initial facilities to be funded with fees are identified in the fee study. Future facilities to serve growth are identified through an annual capital improvement plan and budget process, possibly after completion of a new facility master plan. This method is used for all facility categories in this report, with the exception of the regional transportation fee. All inventories, included in this report are current as of 2016.

### *Planned Facilities Method*

The planned facilities method allocates costs based on the ratio of planned facility costs to demand from new development as follows:

$$\frac{\text{Cost of Planned Facilities}}{\text{New Development Demand}} = \$/\text{unit of demand}$$

This method is appropriate when specific planned facilities can be identified that only benefit new development. Examples include street improvements to avoid deficient levels of service or a sewer trunk line extension to a previously undeveloped area. This method is appropriate when planned facilities would not serve existing development. Under this method, new development funds the expansion of facilities at the standards used for the master facility plan. This method is not used to calculate any fees in this report.

### *System Plan Method*

This method calculates the fee based on: the value of existing facilities plus the cost of planned facilities, divided by demand from existing plus new development:

$$\frac{\text{Value of Existing Facilities} + \text{Cost of Planned Facilities}}{\text{Existing} + \text{New Development Demand}} = \$/\text{unit of demand}$$

This method is useful when planned facilities need to be analyzed as part of a system that benefits both existing and new development. It is difficult, for example, to allocate a new fire station solely to new development when that station will operate as part of an integrated system of fire stations that together achieve the desired level of service. Police substations, civic centers, and regional parks provide examples of similar facilities.

The system plan method ensures that new development does not pay for existing deficiencies. Often facility standards based on policies such as those found in General Plans are higher than existing facility standards. This method enables the calculation of the existing deficiency required to bring existing development up to the policy-based standard. The local agency must secure non-fee funding for that portion of planned facilities required to correct the deficiency to ensure that new development receives the level of service funded by the impact fee. This method is not used to calculate any of fees in this report.

## Organization of the report

This report is organized as follows:

- **Chapter 1, Introduction (this chapter):** summarizes facilities financing in California, the history of the PFF in Stanislaus County, and the general approach;
- **Chapter 2, Growth Forecasts and Unit Cost Estimates:** describes the growth forecasts used to estimate future demand and the unit costs used to estimate total facility costs;
- **Chapter 3, Animal Control:** Charged countywide to residential development, except in the cities of Turlock, Oakdale, Newman and Riverbank.
- **Chapter 4, Behavioral Health:** Charged countywide. Includes all behavioral health facilities in the County, including the teen center, prenatal programs and adult programs.
- **Chapter 5, Criminal Justice:** Charged countywide. Includes criminal justice training center, public defender, and district attorney office space.
- **Chapter 6, Detention:** Charged countywide. Includes juvenile and adult detention facilities. Fee revenue funded the men's jail and juvenile hall expansion.
- **Chapter 7, Emergency Services:** Charged countywide. Includes emergency operations center, and dispatch.
- **Chapter 8, Health:** Charged countywide. Includes health related administrative offices, clinic space and workshop space.
- **Chapter 9, Libraries:** Charged countywide to residential development. Includes all libraries, collections and related equipment in the County.
- **Chapter 10, Other County Facilities:** Charged countywide. Includes all public facilities that do not fit into any other facility categories including facilities housing the Assessor, Auditor-Controller, Board of Supervisors, Central Services, Chief Executive Officer, Child Support Services, Clerk-Recorder, Community Services Agency, County Counsel, Fleet Services, General Services Agency, Planning, Public Works, Strategic Business Technology, and the Treasurer-Tax Collector.
- **Chapter 11, Parks:** Charged countywide to residential development. Fee will fund neighborhood parks in the unincorporated areas and regional parks countywide.
- **Chapter 12, Sheriff Patrol and Investigation:** Only charged in unincorporated areas. Fee funds sheriff facilities, vehicles, and equipment.

- **Chapter 13, Regional Transportation Impact Fee (RTIF):** Charged countywide to fund transportation facilities of regional significance. *This fee is not being updated in this report. Fee schedule shown for informational purposes only.*
- **Chapter 14, Countywide Information Technology:** Charged countywide. Fee revenue will fund major information technology purchases.
- **Chapter 15, Administrative Fee:** Charged countywide to fund costs associated with the administration of the impact fee program.
- **Chapter 16, Implementation:** Provides guidelines for the implementation and ongoing maintenance of the public facilities fee program.
- **Chapter 17, Mitigation Fee Act Findings:** summarizes the five statutory findings required for adoption of the proposed public facilities fees in accordance with the *Mitigation Fee Act* (codified in *California Government Code* Sections 66000 through 66025).

# 2. Growth Forecasts and Unit Cost Estimates

---

Growth forecasts assist in estimating facility needs based on additional service demand. New development is estimated using a base year of 2016 and a planning horizon of 2045. The growth forecast is used throughout this study.

This chapter also presents the unit cost assumptions used throughout the study to estimate the total cost of planned facilities.

## Use of Growth Forecasts for Impact Fees

Estimates of the existing service population and forecasts of growth are critical assumptions used throughout this report. These estimates are used as follows:

- Estimates of existing development in 2016 are used to determine the existing facility standards in the County.
- Estimates of total development at the 2045 planning horizon are used:
  - To determine the total amount of public facilities required to accommodate growth based on the existing facility standards (see Chapter 1), and
  - To estimate total fee revenues.

To measure existing service population and future growth, residential and worker population data are used for all facility categories with the exception of the parks and library fees, which only use population data. These measures are used because the amount of residents and workers is a reasonable indicator of the level of demand for public facilities. The County builds public facilities primarily to serve these populations and, typically, the greater the population the larger the facility required to provide a given level of service.

## Service Population

Different land use types use public facilities at different rates in relation to each other, depending on the services provided. In Chapters 3 through 12 and in Chapter 14 a specific service population is identified for each facility category to reflect total demand.

A service population is a measure of all residents and workers that rely on a given set of services. The service population weights residential land use types against nonresidential land uses based on the relative demand for services between residents and workers.

## Land Use Types

To ensure a reasonable relationship between each fee and the type of development paying the fee, growth forecasts distinguish between different land use types. Where ambiguity exists, the California Building Code may be used as a reference document to identify the proper use category. The land use types used in this analysis are defined below.

- **Single family:** Detached home, or duplex on an individual lot.
- **Multi-family:** All attached multi-family dwellings including triplexes, high and low rise apartments, condominiums, and residential planned unit developments (excluding single family units). This category also applies to mobile home parks.

- **Accessory Dwelling Unit:** Includes attached and detached accessory dwelling units to existing single family residences. The units can be a maximum of 1,200 square feet in size. No more than one accessory dwelling unit is allowed per single family lot, and the property owner must occupy the primary single-family residence or accessory dwelling unit.
- **Commercial:** All commercial and retail, development, including but not limited to: supermarkets, drug stores, department stores, general merchandise, building materials or lumber stores, specialty retail stores, discount stores, hardware/paint stores, video arcades, new and used car sales as well as auto repair shops, fast-food restaurants, sit-down restaurants, banks and Credit Unions, educational or vocational facilities, day care facilities, and gas stations.
- **Office:** Professional offices including, but not limited to, business parks, corporate headquarters, insurance sales and research centers.
- **Industrial:** The manufacture, fabrication, reduction or destruction or processing of any article, substance or commodity or any other treatment thereof in such a manner as to change the form or character thereof. Uses include, but are not limited to, heavy and light industrial, warehousing, and industrial parks.
  - Industrial (small): less than or equal to 20,000 square feet;
  - Industrial (large): greater than 20,000 square feet, further defined in three subcategories:
    - Manufacturing: The conversion of raw materials, components or parts into finished goods that meet a customer's expectations or specifications. Uses which are considered large industrial include, but are not limited to:
      - Bottling plant
      - Cabinet shop
      - Electronics assembly, paper products
      - Food processor, brewery, bakery
      - Machine shop
      - Printing plant
      - Manufacture, fabrication, processing, packaging and treatment of explosives, oil and great products, chemicals and chemical products
      - Metal fabricator
      - Pulp and paper mill
      - Reduction, processing and storage of offal, dead animals, bones or similar materials
      - Rock crushing
      - Sheet-metal shop
      - Welding shop
    - Distribution: Entry, receiving, stocking, and shipping products on their way from supplier to customer. Uses which are considered distribution/ mixed use include but are not limited to:
      - Equipment rental yard
      - Freight
      - Junk handling, processing and storage
      - Landfill – waste products disposal or transfer station
      - Recycling facility
      - Septic tank, cesspool services
      - Wholesale nurseries
      - Distribution center (such as Longs, Wal-Mart, Coca-Cola)

- Warehouse: Facility where the primary activity is the storage of materials. Uses which are considered warehouse include, but are not limited to:
  - Bulk fee storage
  - Corporation yard, freight yard
  - Warehousing, Mini-warehouse
  - Moving and storage service

Some developments may include more than one land use type, such as an industrial warehouse with living quarters (a live-work designation) or a planned unit development with both single and multi-family uses. In these cases, the public facilities fee would be calculated separately for each land use type.

The County should have the discretion to impose the public facilities fee based on the specific aspects of a proposed development regardless of zoning. The guideline to use is the probable occupant density of the development, either residents per dwelling unit or workers per building square foot. The fee imposed should be based on the land use type that most closely represents the probable occupant density of the development.

## Growth Forecasts for Stanislaus County

The base year for this study is the year 2016. Base year population estimates are from California Department of Finance (DOF) January 1, 2016 data. Base year countywide employment estimates are based on data from the Stanislaus County Forecast Summary, July 7, 2016, prepared by the Eberhardt School of Business at the University of the Pacific.

Willdan and the County examined several population projections before selecting a future 2045 population projection from the Center for Rural Entrepreneurship (CRE). Other growth projections examined included projections from the California Department of Finance and the Eberhardt School of Business. Willdan and the County felt that the DOF and Eberhardt projections were too conservative, and represented too great a divergence from the growth projections from the StanCOG traffic model, used in prior PFF updates.

The CRE evaluated the potential effects of the Altamont Corridor Express (ACE) train extension to Stanislaus County. The analysis examined two scenarios: one where full investment in the ACE train system allows for full utilization of the system's capacity, spurring considerable development in Stanislaus County, and a second where a lower level of investment in the system yields lower growth. This PFF update uses the midpoint between those two scenarios to estimate the 2045 residential population in the County. Population is then allocated to each City, based on each city's current proportion of population relative to the Countywide population.

Local government employment is excluded from all current and future employment estimates presented here because local government facilities are typically added to serve new development. Government facilities, therefore, are more likely to result from increased demand for public facilities than to cause that increased demand. Whereas non-government development creates an increased demand for public facilities, development of government facilities occurs to meet that demand. The residents and workers that comprise the service populations outlined in this report constitute only those individuals that create demand for public facilities.

**Table 2.1** presents the current and future demographic estimates used in this study in terms of population and employment for residential and nonresidential development.

**Table 2.1: Population and Employment Estimates and Projections**

	2016	2045	Net Growth 2016 - 2045
<i>Population</i> <sup>1</sup>			
Ceres	46,800	76,500	29,700
Hughson	7,100	11,600	4,500

<sup>1</sup> Household population only. Excludes people living in group quarters.

Population forecast based on Center for Rural Entrepreneurship's ACE Train Population "Mid" Scenario.

<sup>2</sup> Base year adjusted to 2016 using implied compound annual growth rate for each jurisdiction from 2015 to 2045 from the County Forecast. 2045 Projection from County Forecast.

Sources: California Department of Finance, Table E-5, 2016 (base year population and dwelling unit estimates); Center for Rural Entrepreneurship, Scenario Adjustment Factors (planning horizon population estimates); Forecast Summary, July 7, 2016, Eberhardt School of Business (employment estimates and projections); Willdan Financial Services.

## Occupant Densities

Facility demand is estimated based on service population increases. Developers pay the public facilities fee based on the number of additional housing units or building square feet of nonresidential development, so the fee schedule must convert service population estimates to these measures of project size. This conversion is done with average occupant density factors by land use type, shown in **Table 2.2**.

**Table 2.2: Occupancy Density Assumptions**

Residential:

Single Family Unit	3.18	Persons per dwelling unit
Multi-family Unit	2.07	Persons per dwelling unit
Accessory Dwelling Unit	1.00	Persons per dwelling unit

Nonresidential:

Commercial (Retail)	2.41	Employees per 1,000 sq. ft.
Office	2.87	Employees per 1,000 sq. ft.
Industrial (Small)	0.64	Employees per 1,000 sq. ft.
Industrial (Large)		
Manufacturing	0.92	Employees per 1,000 sq. ft.
Distribution	0.37	Employees per 1,000 sq. ft.
Warehouse	0.18	Employees per 1,000 sq. ft.

Sources: Tables B25033 and B25024 from the U.S. Census Bureau, 2015 American Community Survey 1-Year Estimates; Stanislaus Business Development and Workforce Alliance; Willdan Financial Services.

The residential occupant density factors for both the various types of dwelling units were calculated using the most recently available data from US Census' American Community Survey specific to Stanislaus County. Table B25033 identifies the estimated population, by type of dwelling unit. Table B25024 identifies the total amount of dwelling units, by type. The occupant densities resulting from dividing the population by the corresponding dwelling unit type are shown in Table 2.2.

The non-residential density factors were developed based on data compiled by the Stanislaus Business Development and Workforce Alliance (now, Opportunity Stanislaus) and the County.

## Unit Costs

This study makes use of unit costs for land values and building construction. These costs are used to estimate the replacement value of existing facilities, as well as the construction or acquisition costs for planned facilities. Building costs are typically expressed in terms of cost per square foot while land costs are expressed in terms of cost per acre.

**Table 2.3** lists the land and building values used in this study. Land values are listed in terms of cost per acre. The land values listed here were developed in 2016 by a licensed real estate appraisal firm in Modesto, Cogdill & Giomi Inc., specifically for use in this public facilities fee study. Building values are listed per square foot and were informed by recent appraisals and projects in the County, and by County staff. Some public facilities, such as jails and landfills, are

more likely to be located on land with limited development potential. Therefore, this study uses a lower land value for less-desirable land.

**Table 2.3: Unit Costs**

<b>Location / Facility Type</b>	<b>Current Value</b>
<i>Land - Value per acre<sup>1</sup></i>	
Modesto Commercial Land Value	\$ 653,400
Suburban Commercial Land Value	522,720
Transitional Land Value	50,000
Business Park	50,000
Neighborhood Park	70,000
Regional Parks / Open Space	4,000
Landfill - Dry Ground	2,500
Landfill - Orchard Value	28,000
<i>Buildings - Existing value per square foot<sup>2</sup></i>	
Jail / Detention Facilities	\$ 370
Clinic	351
Animal Services Shelter	234
Animal Services Shelter Expansion	474
All other (including office)	206
<i>Park Improvements<sup>2</sup></i>	
Regional Park Improvements	\$ 18,000
Neighborhood Park Improvements	235,000

<sup>1</sup> Values for land in 2016 based on independent appraisal by Cogdill & Giomi.

<sup>2</sup> Values for buildings in 2017 based 2014 value, adjusted by changes in the Engineering News Record's Construction Cost Index for San Francisco.

Sources: Cogdill & Giomi; Stanislaus County; Engineering News Record; Willdan Financial Services.

# 3. Animal Control Facilities

---

The purpose of this fee is to ensure that new development funds its fair share of animal control facilities. The fee will be charged countywide, except in the cities of Turlock, Oakdale, Newman and Riverbank which maintain municipal animal control facilities. The County will use fee revenues to fund the animal services shelter expansion project and any related vehicles and equipment.

## Service Population

Animal control facilities serve both residents and businesses and provide services equally to both incorporated and unincorporated portions of the County, with the exception of the cities of Turlock, Oakdale, Newman and Riverbank, which maintain their own animal control facilities. The City of Modesto conducts its own fieldwork, but does not maintain its own building. Demand for services and associated facilities is based on the County's service population including residents, minus those from the cities of Turlock, Oakdale, Newman and Riverbank. Fee revenue is held and available for use determined by the Animal Services JPA Authority.

**Table 3.1** shows the estimated service population in 2016 and 2045. The demand for countywide animal control facilities is primarily related to the demands that residents place on those facilities.

**Table 3.1: Animal Services Service Population**

	<b>Residents</b>
Existing (2016) <sup>1</sup>	406,400
New Development (2016-2045) <sup>1</sup>	<u>257,800</u>
Total - (2045) <sup>1</sup>	664,200

<sup>1</sup> The cities of Turlock, Oakdale, Riverbank and Newman are excluded from this analysis, as those cities have their own animal services facilities.

Sources: Table 2.1; Willdan Financial Services.

---

## Facility Standards and Planned Facilities

This study uses the existing inventory method to calculate fee schedules for animal services facilities (see *Introduction* for further information). **Table 4.2** presents an inventory of animal services facilities in Stanislaus County along with an estimated current replacement value. An inventory of vehicles and equipment can be found in **Appendix Table A.1**. An inventory of technological assets can be found in **Appendix Table A.11**. The total value of existing animal services facilities is approximately \$15.1 million.

**Table 3.2: Animal Services Facilities Existing Facility Inventory**

	Inventory	Unit Cost <sup>1</sup>	Value
<i>Land (acres)</i>			
Animal Services Shelter - 3647 Cornucopia Way	4.53	\$ 50,000	\$ 227,000
<i>Buildings (square feet)</i>			
Animal Services Shelter - New Portion	25,000	\$ 474	\$ 11,850,000
Animal Services Shelter - Old Portion	9,800	234	2,293,000
Subtotal - Buildings	34,800		\$ 14,143,000
Vehicles & Equipment (from Table A.1)			\$ 341,661
Technology (from Table A.11)			\$ 49,505
Existing Fund Balance			\$ 330,500
Total Value Existing Facilities			\$ 15,091,666

<sup>1</sup> Unit costs based on market value.

Sources: Tables 2.3, A.1 and A.11; Stanislaus County; Willdan Financial Services.

**Table 3.3** shows the existing per capita investment in animal control facilities in 2016. These values were calculated by dividing the value of existing animal control facilities by the existing service population. The resulting cost per capita is \$37.

**Table 3.3: Animal Services Facilities Existing Standard**

Existing Animal Services Facilities	\$ 15,091,666
Existing Service Population	406,400
Facility Standard per Capita	\$ 37
Cost per Resident	\$ 37

<sup>1</sup> Worker weighting factor of 0.31 applied to cost per resident.

Sources: Tables 3.1 and 3.2.

## Use of Fee Revenues

The County can use animal control facilities fee revenues for the construction or purchase of new buildings and land that expands the capacity of the existing system to serve new development. The inclusion of technology in the facilities inventory allows fee revenue to be spent on technological needs related to animal control services. **Table 3.4** displays projected fee revenue through 2045.

**Table 3.4: Projected Revenue**

Facility Standard (Value) per Capita	\$	37
Service Population Growth Within County (2016-2045)		<u>257,800</u>
Projected Fee Revenues	\$	9,538,600

Sources: Tables 3.1 and 3.3.

## Fee Schedule

**Table 3.5** shows the animal control facilities fee schedule. The cost per capita is converted to a fee per unit of new development based on dwelling unit densities from Table 2.2.

**Table 3.5: Animal Services Facilities Impact Fee - Existing Facilities Standard**

Land Use	A	B	C=AxB
	Cost Per Capita	Density	Fee <sup>1</sup>
<i>Residential</i>			
Single Family	\$ 37	3.18	\$ 118
Multifamily	37	2.07	77
Accessory Dwelling Unit	37	1.00	37

<sup>1</sup> Fee per dwelling unit.

Sources: Tables 2.2 and 3.3.

# 4. Behavioral Health

The purpose of this fee is to ensure that new development funds its fair share of behavioral health facilities. The fee will be charged countywide to both residential and nonresidential development. The County will use fee revenues to expand behavioral health facilities, including vehicles and equipment, to serve new development.

## Service Population

Behavioral health facilities serve both residents and businesses and provide services equally to both incorporated and unincorporated portions of the County. Therefore, demand for services and associated facilities are based on the County's service population including residents and workers.

**Table 4.1** shows the estimated service population in 2016 and 2045. The demand for countywide behavioral health facilities is primarily related to the demands that residents and businesses place on those facilities. While specific data is not available to estimate the actual ratio of demand per resident to demand by businesses (per worker) for this service, it is reasonable to assume that demand for these services is less for one employee compared to one resident, because nonresidential buildings are typically occupied less intensively than dwelling units. The 0.31-weighting factor for workers is based on a 40-hour workweek divided by the total number of non-work hours in a week (128) and reflects the degree to which nonresidential development yields a lesser demand for countywide behavioral health facilities.

**Table 4.1: Behavioral Health Facilities Service Population**

	Residents	Workers	Service Population
Existing (2016)	533,800	181,800	590,200
New Development (2016-2045)	338,400	58,900	356,700
Total (2045)	872,200	240,700	946,900
Weighting factor <sup>1</sup>	1.00	0.31	

<sup>1</sup> Workers are weighted at 0.31 of residents based on a 40 hour work week out of a possible 128 non-work hours in a week.

Sources: Table 2.1, Willdan Financial Services.

## Facility Standards

This study uses the existing inventory method to calculate fee schedules for behavioral health facilities (see *Introduction* for further information). **Table 4.2** presents an inventory of behavioral health facilities in Stanislaus County along with an estimated current replacement value. An inventory of vehicles and equipment can be found in **Appendix Table A.2**. An inventory of technological assets can be found in **Appendix Table A.11**. The total value of existing behavioral health facilities is approximately \$17.3 million.

**Table 4.2: Behavioral Health Facilities Existing Inventory**

	Inventory	Units	Unit Cost <sup>1</sup>	Value
<i>Land (acres)</i>				
800 Scenic Drive, Modesto	1.85	Acres	\$ 653,400	\$ 1,209,000
1905 Memorial Drive, Ceres	15.37	Acres	50,000	<u>769,000</u>
				\$ 1,978,000

Facility Standard per Capita	\$	29
Cost per Resident	\$	29
Cost per Worker <sup>1</sup>		9

<sup>1</sup> Worker weighting factor of 0.31 applied to cost per resident.

Sources: Tables 4.1 and 4.2.

## Use of Fee Revenues

The County can use behavioral health facilities fee revenues for the construction or purchase of new buildings, land, vehicles, or equipment that expand the capacity of the existing system to serve new development. Fee revenues may not be used for replacement of aging facilities or equipment or to otherwise correct existing deficiencies unrelated to new development. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to behavioral health services. **Table 4.4** displays projected fee revenue through 2045.

**Table 4.4: Projected Revenue - Existing Standard**

Facility Standard per Capita	\$ 29
Service Population Growth Within County (2016-2045)	<u>356,700</u>
New Development Contribution to Planned Facilities	<u>\$10,344,300</u>

Sources: Tables 4.1 and 4.3.

## Fee Schedule

**Table 4.5** shows the behavioral health facilities fee schedule. The cost per capita is converted to a fee per unit of new development based on dwelling unit and employment densities (persons per dwelling unit or employees per 1,000 square feet of nonresidential building space).

**Table 4.5: Behavioral Health Facilities Fee Schedule - Existing Facilities Standard**

<b>Land Use</b>	<b>A Cost Per Capita</b>	<b>B Density</b>	<b>C=AxB Fee<sup>1</sup></b>	<b>D = C / 1,000 Fee per Sq. Ft.</b>

Distribution	9	0.37	3	0.003
Warehouse	9	0.18	2	0.002

<sup>1</sup> Fee per dwelling unit (residential) or per 1,000 square feet (nonresidential).

Sources: Tables 2.2 and 4.3.

# 5. Criminal Justice

The purpose of this fee is to ensure that new development funds its fair share of criminal justice facilities. The fee will be charged countywide to both residential and nonresidential development. The County will use fee revenues to expand criminal justice facilities, including vehicles and equipment, to serve new development.

## Service Population

Criminal justice facilities serve both residents and businesses and provide services equally to both incorporated and unincorporated portions of the County. Therefore, demand for services and associated facilities are based on the County’s service population including residents and workers.

**Table 5.1** shows the estimated service population in 2016 and 2045. The demand for countywide criminal justice facilities is primarily related to the demands that residents and businesses place on those facilities. While specific data is not available to estimate the actual ratio of demand per resident to demand by businesses (per worker) for this service, it is reasonable to assume that demand for these services is less for one employee compared to one resident, because nonresidential buildings are typically occupied less intensively than dwelling units. The 0.31-weighting factor for workers is based on a 40-hour workweek divided by the total number of non-work hours in a week (128) and reflects the degree to which nonresidential development yields a lesser demand for criminal justice facilities.

**Table 5.1: Criminal Justice Service Population**

	Residents	Workers	Service Population
Existing - Countywide (2016)	533,800	181,800	590,200
New Development - Countywide (2016-2045)	<u>338,400</u>	<u>58,900</u>	<u>356,700</u>
Total - Countywide (2045)	872,200	240,700	946,900
Weighting factor <sup>1</sup>	1.00	0.31	

<sup>1</sup> Workers are weighted at 0.31 of residents based on a 40 hour work week out of a possible 128 non-work hours in a week.

Sources: Table 2.1, Willdan Financial Services.

## Facility Standards

This study uses the existing inventory method to calculate fee schedules for criminal justice facilities (see *Introduction* for further information). **Table 5.2** presents an inventory of criminal justice facilities in Stanislaus County along with each facility’s estimated replacement value. An inventory of vehicles can be found in **Appendix Table A.3**. An inventory of technological assets can be found in **Appendix Table A.11**. The total value of criminal justice facilities is estimated at approximately \$25 million.

**Table 5.2: Criminal Justice Existing Facilities**

Facility	Inventory	Unit Cost <sup>1</sup>	Total Value
<u>Land</u>			
Former Bank of America Building, 1021 I Street, Modesto	0.28 <sup>2</sup> acres	\$ 653,400	\$ 183,000

## Use of Fee Revenues

The County can use criminal justice facilities fee revenues for the construction or purchase of new buildings, land, vehicles, or equipment that expand the capacity of the existing system to serve new development. Fee revenues may not be used for replacement of aging facilities. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to criminal justice services. **Table 5.4** displays projected fee revenue through 2045.

**Table 5.4: Projected Criminal Justice Facility Fee Revenue - Existing Standard**

Facility System Cost Per Capita	\$	42
New Development Service Population (2016-2045)		<u>356,700</u>
New Development Contribution to Planned Facilities	\$	14,981,400

Sources: Tables 5.1 and 5.3.

## Fee Schedule

**Table 5.5** shows the criminal justice facilities fee schedule. The cost per capita is converted to a fee per unit of new development based on dwelling unit and employment densities (persons per dwelling unit or employees per 1,000 square feet of nonresidential building space).

**Table 5.5: Criminal Justice Facility Impact Fees - Existing Inventory Standard**

Land Use	A	B	C=AxB	D = C / 1,000
	Cost Per Capita	Density	Fee <sup>1</sup>	Fee per Sq. Ft.
<i>Residential</i>				
Single Family Unit	\$ 42	3.18	\$ 134	
Multi-family Unit	42	2.07	87	
Accessory Dwelling Unit	42	1.00	42	
<i>Nonresidential</i>				
Commercial	\$ 13	2.41	\$ 31	\$ 0.031
Office	13	2.87	37	0.037

Distribution	13	0.37	5	0.005
Warehouse	13	0.18	2	0.002

<sup>1</sup> Fee per dwelling unit (residential) or per 1,000 square feet (nonresidential).

Sources: Tables 2.2 and 5.3.

# 6. Detention

The purpose of the fee is to ensure that new development funds its fair share of planned countywide detention facilities. Countywide detention refers to the adult and youth incarceration facilities and services provided by the County, in both incorporated and unincorporated areas. The fee will be charged countywide to both residential and nonresidential development. A fee schedule is presented based on the value of existing facilities to ensure that development provides funding to meet its needs. The County will use fee revenues to expand detention facilities, including vehicles and equipment, to serve new development.

## Service Population

Public protection facilities serve both residents and businesses and provide services equally to both incorporated and unincorporated portions of the County. Therefore, the demand for services and associated facilities is based on the County’s service population including residents and workers.

**Table 6.1** shows the estimated service population in 2016 and 2045. The demand for countywide detention facilities is primarily related to the demands that residents and businesses place on the County’s judicial system. While specific data is not available to estimate the actual ratio of demand per resident to demand by businesses (per worker) for this service, it is reasonable to assume that demand for these services is less for one employee compared to one resident, because nonresidential buildings are typically occupied less intensively than dwelling units. The 0.31-weighting factor for workers is based on a 40-hour workweek divided by the total number of non-work hours in a week (128) and reflects the degree to which nonresidential development yields a lesser demand for countywide detention facilities.

**Table 6.1: Detention Facilities Service Population**

	Residents	Workers	Service Population
Existing - Countywide (2016)	533,800	181,800	590,200
New Development - Countywide (2016-2045)	338,400	58,900	356,700
Total - Countywide (2045)	872,200	240,700	946,900
Weighting factor <sup>1</sup>	1.00	0.31	

<sup>1</sup> Workers are weighted at 0.31 of residents based on a 40 hour work week out of a possible 128 non-work hours in a week.

Sources: Table 2.1, Willdan Financial Services.

## Facility Standards

As noted in the *Introduction*, this study uses the existing inventory method to calculate facilities standards for countywide detention facilities. **Table 6.2** presents an inventory of detention facilities in Stanislaus County. An inventory of vehicles and equipment can be found in **Appendix Table A.4**. An inventory of technological assets can be found in **Appendix Table A.11**. Total value for all existing facilities is approximately \$202.6 million.

**Table 6.2: Detention Facilities Existing Facilities**

Facility	Inventory	Unit Cost <sup>1</sup>	Total Value
<u>Land</u>			
Juvenile Justice Center, 2215 Blue Gum Road, Modesto	34.36 acres	\$ 50,000	\$ 1,718,000

**Table 6.3** shows current per capita investment in detention facilities. This value was calculated by dividing the existing investment in detention facilities by the current service population. The cost per resident is \$343, and the cost per worker is \$106.

**Table 6.3: Detention Facilities Cost Per Capita - Existing Inventory Standard**

Total Value Existing Facilities	\$ 202,611,107
2016 Service Population	<u>590,200</u>
Cost Per Capita	\$ 343
Cost Per Resident	\$ 343
Cost Per Worker <sup>1</sup>	106

<sup>1</sup> Workers weighted at 0.31 of residents.

Sources: Tables 6.1 and 6.2.

## Use of Fee Revenues

The County can use detention facilities fee revenues for the construction or purchase of new buildings, land, vehicles, or equipment that expand the capacity of the existing system to serve new development. Fee revenues may not be used for replacement of aging facilities. Projects currently being evaluated that would be eligible for funding include expansion of the Public Safety Center and/or expansion of the Juvenile Justice Detention facilities. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to detention facilities. **Table 6.4** displays projected fee revenue through 2045.

**Table 6.4: Projected Detention Facilities Fee Revenue - Existing Standard**

Facility System Cost Per Capita	\$	343
Service Population Growth Within County (2016-2045)		<u>356,700</u>
New Development Contribution to Planned Facilities	\$	122,348,100

Sources: Tables 6.1 and 6.3.

## Fee Schedule

**Table 6.5** shows the detention facilities fee schedule. The cost per capita is converted to a fee per unit of new development based on dwelling unit and employment densities (persons per dwelling unit or employees per 1,000 square feet of nonresidential building space).

**Table 6.5: Detention Facilities Impact Fees - Existing Inventory Standard**

Land Use	A	B	C = A x B    D = C / 1,000	
	Cost Per Capita	Density	Fee <sup>1</sup>	Fee per Sq. Ft.
<i>Residential</i>

Warehouse	106	0.18	19	0.02

<sup>1</sup> Fee per dwelling unit (residential) or per 1,000 square feet (nonresidential).

Sources: Tables 2.2 and 6.3.

# 7. Emergency Services

The purpose of this fee is to ensure that new development funds its fair share emergency service facilities. The fee will be charged countywide to both residential and nonresidential development. A fee schedule is presented based on the existing standard of emergency service facilities in Stanislaus County to ensure that new development provides adequate funding to meet its needs. The County will use fee revenues to expand emergency services facilities, including vehicles and equipment, to serve new development.

## Service Population

Stanislaus County provides emergency services (dispatch, etc.) to both residents and businesses countywide. Therefore, demand for services and associated facilities is based on a service population that includes residents and workers.

**Table 7.1** shows the estimated service population in 2016 and 2045. The demand for emergency facilities is related to the demands that both residents and businesses place on the County’s emergency response system. While specific data is not available to estimate the actual ratio of demand per resident to demand by businesses (per worker) for this service, it is reasonable to assume that demand for these services is less for one employee compared to one resident, because nonresidential buildings are typically occupied less intensively than dwelling units. The 0.31-weighting factor for workers is based on a 40-hour workweek divided by the total number of non-work hours in a week (128) and reflects the degree to which nonresidential development yields a lesser demand for emergency services facilities.

**Table 7.1: Emergency Services Facilities Service Population**

	Residents	Workers	Service Population
Existing (2016)	533,800	181,800	590,200
New Development (2016-2045)	<u>338,400</u>	<u>58,900</u>	<u>356,700</u>
Total (2045)	872,200	240,700	946,900
Weighting factor <sup>1</sup>	1.00	0.31	

<sup>1</sup> Workers are weighted at 0.31 of residents based on a 40 hour work week out of a possible 128 non-work hours in a week.

Sources: Table 2.1, Willdan Financial Services.

## Facility Standards

This study uses the existing inventory standard to calculate fees for emergency services facilities. **Table 7.2** shows the existing inventory of emergency services facilities, including land, building, vehicles, equipment and technological assets. An inventory of vehicles and equipment can be found in **Appendix Table A.5**. An inventory of technological assets can be found in **Appendix Table A.11**. The total value of all existing emergency services facilities is approximately \$2.9 million.

Regional 911 services are administered under a Joint Powers Agreement (JPA). The JPA began in 2000 and consolidated several dispatch centers in the County. The Oakdale City Fire Department joined the dispatch operation in 2001. At present all fire and law enforcement dispatches in the County are completed from the regional 911 center with the exception of dispatch for the City of Oakdale Police Department, the City of Ceres Police Department, and the City of Turlock Fire and Police Departments.

The Regional 911 program is housed at 3705 Oakdale Road. The building also houses the County's Office of Emergency Services, the City of Modesto Fire Department and a small number of City of Modesto Police Department employees. The building is half owned by the City of Modesto and half owned by the County. The building also serves as the County's Emergency Operations Center. Space for Regional 911 is the first priority and all other uses are based on space available.

Operational costs for Regional 911 are based on a population model that assigns 64 percent of costs to the City of Modesto and 36 percent of costs to the County (which represents the County and its contract cities of Hughson, Patterson, Riverbank, Waterford, and Newman).

Given the vast predominance of services offered countywide, with exceptions noted as above, the emergency services fee is a countywide fee. Mutual aid agreements between cities and the County result in emergency service facilities serving the entire County in many situations, further justifying a countywide emergency services impact fee.

**Table 7.2: Emergency Services Facilities Existing Inventory**

	Amount	Units	Unit Cost <sup>1</sup>	Value
<i>Land (acres)</i>				
3705 Oakdale Road	0.84	acres	\$522,720	\$ 439,000

<sup>1</sup> Unit costs based on market value.

<sup>2</sup> Current as of December 31, 2016. Rounded to the hundreds.

Sources: Stanislaus County; Tables 2.3, A.5 and A.11, Willdan Financial Services.

**Table 7.3** shows current per capita investment in emergency services facilities. This value was calculated by dividing the existing investment in emergency services facilities by the current service population. The cost per capita is \$5.

**Table 7.3: Emergency Services Facilities - Existing Standard**

Existing Emergency Services Facilities	\$ 2,935,266
Existing Service Population	<u>590,200</u>
Facility Standard per Capita	\$ 5
Cost per Resident	\$ 5
Cost per Worker <sup>1</sup>	2

<sup>1</sup> Worker weighting factor of 0.31 applied to cost per resident.

Sources: Tables 7.1 and 7.2.

## Use of Fee Revenues

The County can use emergency services facilities fee revenues for the construction or purchase of new buildings, land, vehicles, or equipment that expand the capacity of the existing system to serve new development. Fee revenues may not be used for replacement of aging facilities. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to emergency services. **Table 7.4** displays projected fee revenue through 2045.

**Table 7.4: Projected Fee Revenue - Emergency Services Facilities**

Facility Standard per Capita	\$ 5
Service Population Growth Within County (2016-2045)	<u>356,700</u>
New Development Fair Share of Planned Facilities	\$ 1,783,500

Sources: Tables 7.1 and 7.3; Willdan Financial Services.

## Fee Schedule

**Table 7.5** shows the emergency services facilities fee schedule. The cost per capita is converted to a fee per unit of new development based on dwelling unit and employment densities (persons per dwelling unit or employees per 1,000 square feet of nonresidential building space).

**Table 7.5: Emergency Services Facilities Impact Fee - Existing Facilities Standard**

Land Use	A	B	C = A x B	D = C / 1,000
	Cost Per Capita	Density	Fee <sup>1</sup>	Fee per Sq. Ft.
<i>Residential</i>				
Single Family	\$ 5	3.18	\$ 16	
Multifamily	5	2.07	10	
Accessory Dwelling Unit	5	1.00	5	
<i>Nonresidential</i>				
Commercial	\$ 2	2.41	\$ 5	\$ 0.005
Office	2	2.87	6	0.006
Industrial (Small)	2	0.64	1	0.001
Industrial (Large)				
Manufacturing	2	0.92	2	0.002
Distribution	2	0.37	1	0.001
Warehouse	2	0.18	0.40	0.000

<sup>1</sup> Fee per dwelling unit (residential) or per 1,000 square feet (nonresidential).

Sources: Tables 2.2 and 7.3; Willdan Financial Services.

# 8. Health Facilities

The purpose of this fee is to ensure that new development funds its fair share of health facilities. The fee will be charged countywide to both residential and nonresidential development. The County will use fee revenues to expand health facilities, including vehicles and equipment, to serve new development.

## Service Population

Stanislaus County provides health services to both residents and businesses countywide. Therefore, demand for services and associated facilities is based on a countywide service population that includes residents and workers.

**Table 8.1** shows the estimated service population in 2016 and 2045. The demand for health facilities is related to the demands that both residents and businesses place on the County's healthcare system. While specific data is not available to estimate the actual ratio of demand per resident to demand by businesses (per worker) for this service, it is reasonable to assume that demand for these services is less for one employee compared to one resident, because nonresidential buildings are typically occupied less intensively than dwelling units. The 0.31-weighting factor for workers is based on a 40-hour workweek divided by the total number of non-work hours in a week (128) and reflects the degree to which nonresidential development yields a lesser demand for health facilities.

**Table 8.1: Health Facilities Service Population**

	Residents	Workers	Service Population
Existing (2016)	533,800	181,800	590,200
New Development (2016-2045)	<u>338,400</u>	<u>58,900</u>	<u>356,700</u>
Total (2045)	872,200	240,700	946,900
Weighting factor <sup>1</sup>	1.00	0.31	

<sup>1</sup> Workers are weighted at 0.31 of residents based on a 40 hour work week out of a possible 128 non-work hours in a week.

Sources: Table 2.1, Willdan Financial Services.

## Facility Standards

This study uses the existing inventory method to calculate impact fees for health facilities (see *Introduction* for further information). **Table 8.2** shows the existing inventory of health facilities owned by Stanislaus County. An inventory of vehicles and equipment can be found in **Appendix Table A.6**. An inventory of technological assets can be found in **Appendix Table A.11**. The total value of existing health facilities is approximately \$65.3 million.

**Table 8.2: Health Facilities Existing Inventory**

	Amount	Units	Unit Cost <sup>1</sup>	Value

<sup>1</sup> Worker weighting factor of 0.31 applied to cost per resident.

Sources: Tables 8.1 and 8.2.

## Use of Fee Revenues

The County can use health facilities fee revenue for the construction or purchase of new buildings, land, vehicles, or equipment that expand the capacity of the existing system to serve new development. Fee revenues may not be used for replacement of aging facilities or equipment or to otherwise correct existing deficiencies unrelated to new development. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to health services. **Table 8.4** shows an estimate of health impact fee revenue through 2045.

**Table 8.4: Projected Health Facilities Fee Revenue - Existing Standard**

# 9. Library Facilities

---

The purpose of this fee is to ensure that new development funds its fair share of library facilities. The fee will be charged countywide to all new residential development. The County will use fee revenues to expand library facilities, including collections and equipment, to serve new development.

## Service Population

Residents are the primary users of libraries. Therefore, demand for library facilities is based on the County's residential population and excludes workers. Stanislaus County provides library services countywide. Therefore, the fee is charged to new residential development countywide. **Table 9.1** shows the service population for library facilities for both 2016 and 2045.

**Table 9.1: Library Facilities Service Population**

	Residents
Existing (2016)	533,800
New Development (2016-2045)	<u>338,500</u>
Total - Countywide (2045)	872,300

Source: Table 2.1, Willdan Financial Services.

---

## Facility Standards

This study uses the existing inventory method to calculate fee schedules for library facilities (see *Introduction* for further information). **Table 9.2** presents an inventory of existing library facilities, including land, buildings, vehicles, equipment and collections, in Stanislaus County. An inventory of collections can be found in **Appendix Table A.7**. An inventory of vehicles can be found in **Appendix Table A.8**. An inventory of technological assets can be found in **Appendix Table A.11**. The total existing value of library facilities is approximately \$58.5 million.

**Table 9.2: Existing Library Facilities**

Existing Facilities	Amount	Units	Unit Cost <sup>1</sup>	Total Value
<u>Land</u>				
1305 Kern Street, Newman Branch Library	0.29	acres	\$ 50,000	\$ 14,500

## Use of Fee Revenues

The County can use library facilities fee revenues for the construction or purchase of new buildings, land, vehicles, volumes, or equipment that expand the capacity of the existing system to serve new development. Fee revenues may not be used for replacement of aging facilities or equipment or to otherwise correct existing deficiencies unrelated to new development. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to library services. **Table 9.4** shows an estimate of library impact fee revenue through 2045.

<sup>1</sup> Fee per dwelling unit.

Sources: Tables 2.2 and 9.3.

# 10. Other County Facilities

This chapter addresses the need for other county facilities needed to serve projected development including office space, shop space, and related equipment. The majority of facilities included in this chapter benefit all of the unincorporated areas of Stanislaus County as well as the incorporated cities, resulting in a countywide service population. Some facilities serve either the unincorporated area almost exclusively (public works facilities) or have some functions that are countywide and others that exclusively serve the unincorporated area (e.g., some County planning functions). The County will use fee revenues to expand other county facilities, including vehicles and equipment, to serve new development.

## Service Population

**Table 10.1** shows the existing and future projected service population for other county facilities. While specific data is not available to estimate the actual ratio of demand per resident to demand by businesses (per worker) for this service, it is reasonable to assume that demand for these services is less for one employee compared to one resident, because nonresidential buildings are typically occupied less intensively than dwelling units. The 0.31-weighting factor for workers is based on a 40-hour workweek divided by the total number of non-work hours in a week (128) and reflects the degree to which nonresidential development yields a lesser demand for other county facilities. Because some facilities exclusively serve the unincorporated area, the countywide and unincorporated-only service populations are both shown in Table 10.1.

**Table 10.1: Other County Facilities Service Population**

	Residents	Workers	Service Population
<i>Countywide</i>			
Existing (2016)	533,800	181,800	590,200
New Development (2016-2045)	<u>338,400</u>	<u>58,900</u>	<u>356,700</u>
Total (2045) - Countywide	872,200	240,700	946,900
<i>Unincorporated</i>			
Existing (2016)	112,100	45,600	126,200
New Development (2016-2045)	<u>71,100</u>	<u>12,300</u>	<u>74,900</u>
Total (2045) - Unincorporated	183,200	57,900	201,100
Weighting factor <sup>1</sup>	1.00	0.31	

<sup>1</sup> Workers are weighted at 0.31 of residents based on a 40 hour work week out of a possible 128 non-work hours in a week.

Sources: Table 2.1, Willdan Financial Services.

## Facility Inventories

The County of Stanislaus owns a number of facilities that are classified as ‘other county facilities.’ The functions housed in these facilities include fleet services, central services, the Assessor, the Board of Supervisors, public works and other general government functions and support space.

In addition to office space, facilities included in this chapter include shop and warehouse facilities. **Tables 10.2a** and **10.2b** display the County’s existing inventory of ‘other county facilities.’

**Tables 10.3a, and 10.3b** show the allocation of the facilities from Tables 10.2a and 10.2b, and tables from the Appendix by service area. The “% Countywide” column estimates the proportion of each facility serving a countywide function. The “% Unincorporated Only” column estimates the proportion of each facility supporting a County of Stanislaus service that serves only the unincorporated areas of the County.

**Table 10.4** summarizes the allocation of other county facilities to countywide and unincorporated service populations.

Inventory of vehicles and equipment can be found in **Appendix Tables A.9 and 10**. An inventory of technological assets can be found in **Appendix Table A.11**.

**Table 10.2a: Other County Facilities Existing Inventory - Land**

	Amount	Units	Unit Cost <sup>1</sup>	Value

## Facility Standard

The County's projected growth in service population will create a need for additional other county facilities. The County must expand its facilities to maintain existing facility standards as new development occurs in the County. **Table 10.5** shows the calculation of the existing value per capita standard for both unincorporated and incorporated areas of the County. The value per capita in the unincorporated areas is equal to the sum of the countywide and the unincorporated only value per capita.

**Table 10.5: Other County Facilities Existing Standard**

<i>Unincorporated Only</i>		
Existing Other County Facilities	\$	41,896,194
Existing Service Population		<u>126,200</u>
Facility Standard per Capita	\$	332
Cost per Resident	\$	332
Cost per Worker <sup>1</sup>		103
<i>Countywide</i>		
Existing Other County Facilities	\$	197,668,073
Existing Service Population		<u>590,200</u>
Facility Standard per Capita	\$	335
Cost per Resident	\$	335
Cost per Worker <sup>1</sup>		104

<sup>1</sup> Worker weighting factor of 0.31 applied to cost per resident.

Sources: Tables 10.1 and 10.4; Willdan Financial Services.

## Use of Fee Revenues

The County can use other county facilities fee revenue for the construction or purchase of new buildings, land, vehicles, or equipment that expand the capacity of the existing system to serve new development. Fee revenue may not be used for replacement of aging facilities or equipment or to otherwise correct existing deficiencies unrelated to new development. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to other county services. **Table 10.6** shows the projection of countywide and unincorporated-only County fee revenue to new development based on the existing standards and the resulting cost per capita.

**Table 10.6: Projected Other County Facilities Fee Revenue**

<i>Unincorporated</i>	
Facility Standard per Capita	\$ 332
Service Population Growth in Unincorporated (2016-2045)	<u>74,900</u>
New Development Fair Share of Planned Facilities	\$ 24,866,800
<i>Countywide</i>	
Facility Standard per Capita	\$ 335
Service Population Growth Within County (2016-2045)	<u>356,700</u>
New Development Fair Share of Planned Facilities	\$ 119,494,500

Sources: Tables 10.1 and 10.5.

## Fee Schedule

**Table 10.7** displays the other county facilities fee schedule. The cost per capita is converted to a fee per unit of new development based on dwelling unit and employment densities (persons per dwelling unit or employees per 1,000 square feet of nonresidential building space).

**Table 10.7: Other County Facilities Impact Fee - Existing Facilities Standard**

Land Use	A	B	C = A x B		D = C / 1,000
	Cost Per Capita	Density	Fee <sup>1</sup>		Fee per Sq. Ft.

# 11. Park Facilities

---

The purpose of the park facilities fee is to ensure that new development funds its fair share of parks and open space facilities. The “Regional Parks / Open Space” component of the fee will be charged countywide. New development in the unincorporated area of the County will pay both the regional parks and open space component and the “Neighborhood Parks” component of the fee. The County will use fee revenues to expand park facilities, including vehicles and equipment, to serve new development.

## Service Population

Residents are the primary users of parks and open space facilities. Therefore, demand for parks and associated facilities are based on the County’s residential population and exclude workers. **Table 11.1** provides estimates of the current resident population and a forecast for the year 2045. Because some neighborhood parks exclusively serve the unincorporated area, the countywide and unincorporated-only service populations are both shown in Table 11.1.

**Table 11.1: Parks Service Population**

	<b>Residents</b>
Existing - Countywide (2016)	533,800
New Development - Countywide (2016-2045)	<u>338,400</u>
Projected Total - Countywide (2045)	872,200
Existing - Unincorporated (2016)	112,100
New Development - Unincorporated (2016-2045)	<u>71,100</u>
Projected Total - Unincorporated (2045)	183,200

Source: Table 2.1, Willdan Financial Services.

---

## Facility Standards

The County’s inventory of park facilities is summarized in **Table 11.2**. Parks are divided into two categories: 1) Neighborhood Parks and 2) Regional Parks / Open Space. The acreage for each park is differentiated into either improved or unimproved acreage, as the value of developed parkland is far greater than undeveloped parkland, as shown in Table 11.3.

**Table 11.2: Existing Parkland Inventory**

## Unit Costs

Unit costs represent the land costs and level of improvements that existing development has provided to date. Using unit costs to determine a facility standard ensures that the cost of facilities to serve new development is not artificially increased, and new development unfairly burdened, compared to existing development.

The unit costs used to estimate the total investment in parkland facilities are shown in **Table 11.3**. Land acquisition costs and improvement costs are based on the County's experience with park development. An inventory of vehicles and equipment can be found in **Appendix Table A.12**. An inventory of technological assets can be found in **Appendix Table A.11**.

**Table 11.3: Parkland Unit Costs**

	Building SF	Unit Cost	Total Cost	Cost Per Acre
<i>Regional / Open Space - Countywide Park Improvements/Special Use Facilities</i>				
Buildings				
Fox Grove Regional Park, 1200 Geer Road	1,500	\$ 206	\$ 309,000	
Frank Raines Park, Del Puerto Canyon Road	13,573	206	2,796,000	
La Grange Regional Park, 161 South Old LaGrange Road	600	206	123,600	
Modesto Reservoir, 18143 Reservoir Road	9,203	206	1,895,800	
Woodward Reservoir, 14528 26 Mile Road	<u>10,973</u>	206	<u>2,260,400</u>	
Subtotal	35,849		\$ 7,384,800	
Vehicles and Equipment (Table A.12)			\$ 2,755,611	
Technology (from Table A.11)			<u>76,902</u>	
Total Special Use Facilities			\$10,217,313	
Equivalent Improved Park Acres			<u>2,375.61</u>	
Special Use Facilities Cost per Improved Acre				\$ 4,000
Regional Park Improvements				<u>16,520</u>
Regional Park Improvements Per Acre Subtotal				\$ 20,520
<i>Neighborhood - Unincorporated Park Improvements</i>				
Buildings				
Bonita Pool, Crows Landing	1,000	\$ 206	\$ 206,000	
Subtotal			\$ 206,000	
Equivalent Improved Park Acres			81.22	
Special Use Facilities Cost per Improved Acre				\$ 3,000
Neighborhood Park Improvements				<u>220,280</u>
Park Improvements Per Acre Subtotal				\$ 223,280

Sources: Tables 11.2 and 11.3; Stanislaus County; Willdan Financial Services

To calculate new development's need for new parks, a ratio expressed in terms of developed park acres per 1,000 residents is used, known as a park standard. To compare all parkland in the system, the undeveloped park acres must be converted into an equivalent amount of improved acres. This conversion is based on the cost of an unimproved acre relative to an improved acre and is displayed in **Table 11.4**.

**Table 11.4: Unimproved Acreage - Parkland Equivalent**

Parkland Type	Calculation	
<i>Neighborhood Parks - Unincorporated</i>		
Average Land Cost per Acre	A	\$ 70,000
Improvements Cost per Acre	C	<u>220,280</u>
Total Cost per Acre	$C = A + B$	\$ 290,280
Equivalent Improved Acres	$D = A / C$	0.24
Number of Unimproved Acres	E	<u>11.79</u>
Equivalent Improved Acres	$F = D \times E$	2.84
<i>Regional Parks / Open Space - Countywide</i>		
Average Land Cost per Acre	G	\$ 4,000
Improvements Cost per Acre	H	<u>16,520</u>
Total Cost per Acre	$I = G + H$	\$ 20,520
Equivalent Improved Acres	$J = G / I$	0.19
Number of Unimproved Acres	K	<u>6,701.70</u>
Equivalent Improved Acres	$L = J \times K$	1,306.37

Sources: Table 11.2 and 11.3, Willdan Financial Services.

**Table 11.5** shows the existing equivalent park standard per 1,000 residents for the current service population. The standard for unincorporated area neighborhood parks is calculated separately from the countywide regional parks and open space standard.

**Table 11.5: County Parks and Open Space Facility - Existing Standards**

	Calculation	Neighborhood Parks - Unincorporated	Regional Parks / Open Space - Countywide
Improved Park Acreage	A	78.38	1,069.24
Equivalent Improved Acres	B	<u>2.84</u>	<u>1,306.37</u>
Total Acres of Improved Parkland	$C = A + B$	81.22	2,375.61
Service Population (Residents)	D	112,100	533,800
Existing Standard (Acres per 1,000 Residents)	$E = C / (D/1,000)$	0.72	4.45

Sources: Tables 11.1, 11.2 and 11.4, Willdan Financial Services.

**Table 11.6** calculates cost of needed facilities to serve new development. This is done in two steps: first, the facility standard is multiplied by the projected growth to determine the acreage needed by 2045 to serve the projected growth; then the unit costs from Table 11.3 are multiplied

by the needed acreage to determine the total cost of needed facilities to accommodate new development.

**Table 11.6: Park Facilities to Accommodate New Development**

	Neighborhood Parks	Regional Parks / Open Space
<i>Parkland and Improvements (Mitigation Fee Act)</i>		
Facility Standard (acres/1,000 residents)	0.72	4.45
Resident Growth (2016-2045)	71,100	338,400
Facility Needs (acres)	51.19	1,505.88
Average Land Cost (per acre)	\$ 70,000	\$ 4,000
Subtotal - Land Costs	3,583,000	6,024,000
Average Improvements Cost (per acre)	\$ 223,280	\$ 20,520
Subtotal - Improvements Costs	\$ 11,430,000	\$ 30,901,000
Total Cost of Facilities	\$ 15,013,000	\$ 36,925,000

Sources: Tables 11.1, 11.3, 11.4 and 11.5, Willdan Financial Services.

**Table 11.7** shows current per capita costs for residents. These values were calculated by multiplying the value of existing parkland and park improvements by the current facility standard, and then dividing that figure by 1,000 to reach the existing cost per capita.

**Table 11.7: Park Facilities Investment Per Capita**

	Calculation	Land Acquisition	Improvements
<i>Neighborhood Parks - Unincorporated</i>			
Parkland Investment (per acre)	A	\$ 70,000	\$ 223,280
Facility Standard (acres per 1,000 residents)	B	0.72	0.72
Total Cost Per 1,000 capita	$C = A \times B$	\$ 50,000	\$ 161,000
Cost Per Resident	$D = C / 1,000$	\$ 50	\$ 161
<i>Regional Parks / Open Space - Countywide</i>			
Parkland Investment (per acre)	E	\$ 4,000	\$ 20,520
Facility Standard (acres per 1,000 residents)	F	4.45	4.45
Total Cost Per 1,000 capita	$G = E \times F$	\$ 18,000	\$ 91,000
Cost Per Resident	$H = G / 1,000$	\$ 18	\$ 91

Sources: Tables 11.3, and 11.5; Willdan Financial Services.

## Use of Fee Revenues

The County can use park facilities fee revenues for the construction or purchase of new buildings, land, land improvements, vehicles, or equipment that expand the capacity of the existing parks system to serve new development. Fee revenues may not be used for replacement of aging facilities or equipment or to otherwise correct existing deficiencies unrelated to new development. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to park services.

As shown in **Table 11.6** above, new development's fair share of planned parks facilities is \$15 million for neighborhood parks and \$36.9 million for regional parks and open space through 2045.

## Fee Schedule

The park facilities fee schedule is displayed in **Table 11.8**. The cost per capita from table 11.7 is converted to a fee per unit of new development based on dwelling unit densities (persons per dwelling unit).

**Table 11.8: Park Facilities Impact Fee**

Land Use	A		B	C=AxB	
	Cost Per Capita			Density	Fee <sup>1</sup>
<i>Neighborhood Parks - Unincorporated</i>					
Single Family					
Land Acquisition	\$	50	3.18	\$	159
Improvements		161	3.18		<u>512</u>
Total				\$	671
Multifamily					
Land Acquisition	\$	50	2.07	\$	104
Improvements		161	2.07		<u>333</u>
Total				\$	437
Accessory Dwelling Unit					
Land Acquisition	\$	50	1.00	\$	50
Improvements		161	1.00		<u>161</u>
Total				\$	211
<i>Regional Parks / Open Space - Countywide</i>					
Single Family					
Land Acquisition	\$	18	3.18	\$	57
Improvements		91	3.18		<u>289</u>
Total				\$	346
Multifamily					
Land Acquisition	\$	18	2.07	\$	37
Improvements		91	2.07		<u>188</u>
Total				\$	225

# 12. Sheriff Patrol and investigation

This chapter documents a reasonable relationship between new development and the funding for proposed sheriff patrol and investigation facilities in the unincorporated areas of Stanislaus County. The sheriff patrol and fee will only be charged in the unincorporated areas of the County. Fee revenue will be spent on expanding facilities, including vehicles and equipment, to serve new development.

## Service Population

Both residents and workers in unincorporated portions of Stanislaus County benefit from services provided by the sheriff department. Therefore, demand for sheriff patrol and investigation facilities is based on the County's combined unincorporated residential and worker populations. While specific data is not available to estimate the actual ratio of demand per resident to demand by businesses (per worker) for this service, it is reasonable to assume that demand for these services is less for one employee compared to one resident, because nonresidential buildings are typically occupied less intensively than dwelling units. The 0.31-weighting factor for workers is based on a 40-hour workweek divided by the total number of non-work hours in a week (128) and reflects the degree to which nonresidential development yields a lesser demand for sheriff patrol and investigation facilities. **Table 12.1** provides estimates of the resident and worker populations in the unincorporated areas of the County with forecasts for the year 2045.

**Table 12.1: Sheriff Patrol and Investigation Service Population**

	Residents	Workers	Service Population
Existing - Unincorporated (2016)	112,100	45,600	126,200
New Development - Unincorporated (2016-2045)	<u>71,100</u>	<u>12,300</u>	<u>74,900</u>
Total - Unincorporated Countywide (2045)	183,200	57,900	201,100
Weighting factor <sup>1</sup>	1.00	0.31	

<sup>1</sup> Workers are weighted at 0.31 of residents based on a 40 hour work week out of a possible 128 non-work hours in a week.

Sources: Table 2.1, Willdan Financial Services.

## Facility Standards

The sheriff patrol and investigation fee uses the existing standard to calculate the impact fees for sheriff patrol and investigation facilities. This standard is based on the current investment per capita in sheriff patrol and investigation facilities in Stanislaus County. **Table 12.2** presents a complete inventory of existing facilities. Vehicles currently owned by the Stanislaus County Sheriff Department are listed in **Appendix Table A.13**. An inventory of technological assets can be found in **Appendix Table A.11**.

**Table 12.2: Sheriff Patrol and Investigation Existing Facility Inventory**

Existing Facilities	Inventory	Unit Cost <sup>1</sup>	Total Value
<i>Land</i>			
Former City Hall Building (801 11th St)	0.10 <sup>1</sup> acres	\$ 653,400	\$ 65,340
Public Safety Center (Sheriff Operations) - 200 - 442 Hackett	2.69 acres	50,000	134,500
County Center III - 909 - 939 County Center III Drive, Modesto	0.58 acres	522,720	303,178
County Center III - Coroner	4.22 acres	522,720	2,205,878
Subtotal	7.59 acres		\$ 2,708,896
<i>Buildings</i>			
Equestrian Center	755 sq. ft.	\$ 206	\$ 155,500
Public Safety Center Support Services Building	44,450 sq. ft.	206	9,156,700
Sheriff Information Technology Office	4,800 sq. ft.	206	988,800
Canine Unit	896 sq. ft.	206	184,600
Equestrian Unit Building B	755 sq. ft.	206	155,500
Bureau of Administrative Services	2,160 sq. ft.	206	445,000
Sheriff Storage Modular	720 sq. ft.	206	148,300
Sheriff's Storage Modular #2	1,440 sq. ft.	206	296,600

## Use of Fee Revenues

The County can use sheriff patrol and investigation facilities fee revenues for the construction or purchase of new buildings, land, land improvements, vehicles, or equipment that expand the capacity of the existing system to serve new development. Fee revenues may not be used for replacement of aging facilities or equipment or to otherwise correct existing deficiencies unrelated to new development. The inclusion of technological assets in the facility inventory will allow fee revenue to be spent on technology related to sheriff patrol and investigation services.

**Table 12.4** shows an estimate of sheriff patrol and investigation impact fee revenue through 2045.

**Table 12.4: Projected Sheriff Facilities Fee Revenue - Existing Standard**

Facility Standard per Capita	\$	339
Service Population Growth in Unincorporated (2016-2045)		<u>74,900</u>
New Development Fair Share of Planned Facilities	\$	25,391,100

Sources: Tables 12.1 and 12.3.

## Fee Schedule

**Table 12.5** displays the sheriff patrol and investigation facilities fee schedule. The cost per capita is converted to a fee per unit of new development based on dwelling unit and employment densities (persons per dwelling unit or employees per 1,000 square feet of nonresidential building space).

**Table 12.5: Sheriff Patrol and Investigation Facilities Impact Fee - Existing Facilities Standard**

Land Use	A	B	C = A x B		D = C / 1,000
	Cost Per Capita	Density	Fee <sup>1</sup>	Fee per Sq. Ft.	
<i>Residential</i>					
Single Family	\$ 339	3.18	\$ 1,078		
Multifamily	339	2.07	702		
Accessory Dwelling Unit	339	1.00	339		
<i>Nonresidential</i>					
Commercial	\$ 105	2.41	\$ 253	\$ 0.25	
Office	105	2.87	301	0.30

# 13. Regional Transportation Impact Fee (RTIF)

---

The County's Regional Transportation Impact Fee (RTIF) is not being updated at this time. The existing RTIF schedule is presented below for informational purposes only. The County expects that future revisions to the RTIF will be guided by StanCOG, with the participation of all member jurisdictions. A November 2014 memorandum from StanCOG's director to the Policy Board outlined the recommended modifications to the program:

- The RTIF project list will include three major regional transportation projects and these projects will have priority for RTIF funding: North County Corridor (NCC), (2) South County Corridor (SCC), and (3) State Route 132 (SR 132).
- The RTIF may include the following additional projects subject to available funding: (1) Crows Landing Road from SR-99 to I-5, (2) Faith Home Road from SR-132 to Hatch Road, (3) SR-99 Interchange at Service/Mitchell Roads, plus (4) a small budget for planning studies for additional projects to be determined.
- Administration of the RTIF program will move from the County to a Joint Powers Authority (JPA). All nine cities and the County will either form a new JP A or continue to use Stan COG as the designated Transportation Authority.
- The County anticipates adopting a new transportation impact fee program distinct from the RTIF to address impacts of growth in unincorporated areas such as the Salida and Crows Landing areas.
- The new RTIF would be implemented on or about July 1, 2017 concurrent with the County's update of its Public Facilities Fee (PFF) program. The updated PFF program would eliminate the current transportation fee, the County would retain any existing fund balance to complete projects on the existing PFF list, and the RTIF would take the place of the PFF transportation fee.

Work on the updated fee program has not yet substantially begun. The County expects to bring this fee to StanCOG for further analysis shortly after anticipated adoption of this 2018 PFF update.

## Existing Fee Schedule

**Table 13.1** displays the County's existing regional transportation impact fee schedule.

**Table 13.1: Regional Transportation Facilities  
Fee Schedule**

<b>Land Use</b>	<b>Existing Fee<sup>1</sup></b>
<i>Residential (per dwelling unit)</i>	
Single Family	\$ 4,379
Multi-family	2,684
<i>Nonresidential (per 1,000 square feet)</i>	
Office	\$ 3,531
Industrial	
Industrial (Small)	\$ 1,610
Industrial (Large)	
Manufacturing	\$ 1,695
Mixed Use / Distribution	1,978
Warehouse	1,045
Commercial	
Small Retail (<50,000 sq. ft.)	\$ 2,006
Medium Retail (50-100,000 sq. ft.)	2,995
Shopping Center (100-300,000 sq. ft.)	2,769
Shopping Mall (>300,000 sq. ft.)	1,695
Church	\$ 650
Hospital	1,158
Nursing Home	424
<i>Special Cases</i>	
Drive Through (per lane)	\$ 17,600
Gas Station (per pump)	6,865
Motel/Hotel (per room)	706
Golf Course (per acre)	848

<sup>1</sup> Fee per dwelling unit or thousand square feet of building space unless otherwise noted

Source: Public Facilities Fee Program Inflationary Update Memorandum, June 13, 2014, Willdan Financial Services.

## Fee per Accessory Dwelling Unit

To calculate a fee for the accessory dwelling unit category, the existing fee per trip of \$2,825 is multiplied by a trip demand factor of 0.43 trips per accessory dwelling unit resulting in a fee of \$1,215 per accessory dwelling unit. **Table 13.2** details the calculation.

**Table 13.2: Fee per Accessory Dwelling Unit**

---

Trip Demand Factor <sup>1</sup>	0.43
Cost per Trip <sup>2</sup>	\$ 2,825
Fee per Accessory Dwelling Unit	\$ 1,215

---

<sup>1</sup> Based on a PM Peak hour trip rate of 0.28 trips per person, a diverted trip factor of 1.0 and a causality adjustment factor of 1.53. Diverted trip factor and causality adjustment factor consistent with other residential assumptions in current RTIF.

<sup>2</sup> Consistent with current RTIF.

Sources: Stanislaus County Regional Transportation Impact Fee; ITE Trip Generation Manual; Willdan.

---

# 14. Countywide Information Technology

The purpose of this fee is to ensure that new development funds its fair share of information technology needs. Information technology to be funded by this fee includes major software licenses and related items. The County would use fee revenues to expand information technology equipment to serve new development.

## Service Population

Stanislaus County provides services to both residents and businesses countywide. Therefore, demand for services and associated facilities is based on a countywide service population that includes residents and workers.

**Table 14.1** shows the estimated service population in 2016 and 2045. The demand for information technology equipment is related to the demands that both residents and businesses place on the County’s information technology infrastructure. While specific data is not available to estimate the actual ratio of demand per resident to demand by businesses (per worker) for this service, it is reasonable to assume that demand for these services is less for one employee compared to one resident, because nonresidential buildings are typically occupied less intensively than dwelling units. The 0.31-weighting factor for workers is based on a 40-hour workweek divided by the total number of non-work hours in a week (128) and reflects the degree to which nonresidential development yields a lesser demand for information technology equipment.

**Table 14.1: Countywide IT Service Population**

	Residents	Workers	Service Population
Existing (2016)	533,800	181,800	590,200
New Development (2016-2045)	338,400	58,900	356,700
Total (2045)	872,200	240,700	946,900
Weighting factor <sup>1</sup>	1.00	0.31	

<sup>1</sup> Workers are weighted at 0.31 of residents based on a 40 hour work week out of a possible 128 non-work hours in a week.

Sources: Table 2.1, Willdan Financial Services.

## Facility Standards

This study uses the existing inventory method to calculate impact fees for Enterprise specific information technology equipment (see *Chapter 1: Introduction* for further information). Department specific IT inventories in each category’s impact fee (when appropriate) so that fee revenue from each category can be spent on IT to serve new development. **Table 14.2** shows the

existing inventory of information technology assets owned by Stanislaus County. The total value of existing information technology assets is approximately \$2.1 million.

**Table 14.2: Countywide IT Inventory<sup>1</sup>**

Item	Total Cost
Computers	\$ 140,214
Fileservers	544,383
Miscellaneous	112,703
Network Hardware	898,874
Software	272,461
Total	\$ 1,968,635
PFF Fund Balance <sup>2</sup>	\$ 92,500
Total	\$ 2,061,135

<sup>1</sup> This inventory primarily contains software, although the net amounts listed may include some incidental non-depreciated hardware (hardware that does not meet the cost threshold of being considered an asset). The inventory only includes the initial purchase cost of the systems, and does not include license renewals.

<sup>2</sup> Current as of December 31, 2016. Rounded to the hundreds.

Source: Stanislaus County.

**Table 14.3** shows current per capita investment in information technology equipment. This value was calculated by dividing the existing investment in information technology assets by the current service population. The cost per capita is \$3.

**Table 14.3: Countywide IT Existing Standard**

Existing Value of Countywide IT	\$ 2,061,135
Existing Service Population	590,200
Facility Standard per Capita	\$ 3
Cost per Resident	\$ 3
Cost per Worker <sup>1</sup>	1

<sup>1</sup> Worker weighting factor of 0.31 applied to cost per resident.

Sources: Tables 14.1 and 14.2.

## Use of Fee Revenues

The County can use information technology equipment fee to purchase new information technology assets that expand the capacity of the existing system to serve new development. Fee revenues may not be used for replacement of aging facilities or equipment or to otherwise correct existing deficiencies unrelated to new development. **Table 14.4** shows an estimate of information technology impact fee revenue through 2045.

**Table 14.4: Fee Revenue Projection - Existing Standard**

Facility Standard per Capita	\$	3
Service Population Growth Within District (2016-2045)		<u>356,700</u>
New Development Fair Share of Planned Facilities	\$	1,070,100

Sources: Tables 14.1 and 14.3.

## Fee Schedule

**Table 14.5** displays the information technology equipment fee schedule. The cost per capita is converted to a fee per unit of new development based on dwelling unit and building space densities (persons per dwelling unit for residential development and employees per 1,000 square feet of building space for non-residential development).

**Table 14.5: Countywide IT Facilities Impact Fee - Existing Facilities Standard**

Land Use	A	B	C = A x B		D = C / 1,000
	Cost Per Capita	Density	Fee <sup>1</sup>	Fee per Sq. Ft.	
<i>Residential</i>

Sources: Tables 2.2 and 14.3.

# 15. Administrative Charge

---

An administrative charge of two-percent of the total impact fee is calculated in this chapter. The administrative charge funds costs that include: (1) a standard overhead charge applied to all County programs for legal, accounting, and other departmental and Countywide administrative support, (2) capital planning and programming associated with the share of projects funded by the impact fee, and (3) impact fee program administrative costs including revenue collection, revenue and cost accounting, mandated public reporting, and fee justification analyses. The administrative charge can be used for costs related to the preparation and management of capital improvement project documents whose tasks clearly tie to facilities required to accommodate growth, including master facility planning documents.

**Tables 15.1, 15.2 and 15.3** show the total fee, including the administrative charge for each fee zone scenario, corresponding with Tables E.1, E.2 and E.3.

**Table 15.1: Administrative Fee - Unincorporated**

<b>Land Use</b>	<b>Total Base Impact Fee</b>	<b>Admin Charge (2%)</b>	<b>Total Fee</b>
<i>Residential (Per Dwelling Unit)</i>			
Single Family / Duplex	\$ 10,759	\$ 215	\$ 10,974
Multifamily / Mobile Home	6,837	137	6,974
Accessory Dwelling Unit	3,221	64	3,285

# 16. Implementation

---

## Impact Fee Program Adoption Process

Impact fee program adoption procedures are found in the *California Government Code* section 66016. Adoption of an impact fee program requires the Board of Supervisors to follow certain procedures including holding a public meeting. Data, such as an impact fee report, must be made available at least 10 days prior to the public meeting. The County's legal counsel should be consulted for any other procedural requirements as well as advice regarding adoption of an enabling ordinance and/or a resolution. After adoption there is a mandatory 60-day waiting period before the fees go into effect.

## Inflation Adjustment

The County has kept its impact fee program up to date by periodically adjusting the fees for inflation. Such adjustments should be completed regularly to ensure that new development will fully fund its share of needed facilities. To maintain consistency with other County documents, we recommend that the fees be adjusted for inflation annually.

There are no inflation indices that are specific to Stanislaus County. We recommend that the following indices be used for adjusting fees for inflation:

- ◆ Buildings, Improvements – Engineering News Record's Building Cost Index (BCI) – San Francisco, CA
- ◆ Equipment – Consumer Price Index, All Items, 1982-84=100 for All Urban Consumers (CPI-U) – for the West Urban Region, Size B/C

Due to the highly variable nature of land costs, there is no particular index that captures fluctuations in land values. We recommend that the County adjust land values based on an annual appraisal of each of the types of land included in Table 2.3.

While fee updates using inflation indices are appropriate for periodic updates to ensure that fee revenues keep up with increases in the costs of public facilities, the County will also need to conduct more extensive updates of the fee documentation and calculation (such as this study) when significant new data on growth forecasts and/or facility plans become available. Note that decreases in index value will result in decreases to fee amounts.

The steps necessary to update fees for inflation are explained below:

For all of the fee categories except the park facilities fees, the steps are as follows:

1. For each facility type (land, buildings, equipment), identify the percent change in facility value since the last update, based on changes in each inflation index or for each type of land.
2. Modify the value of each facility, existing and planned (if applicable) by the percent change identified in Step 1.
3. Depending on fee methodology for each particular fee category calculate the total value of existing facilities (existing inventory method), or the value of existing facilities plus planned facilities (system plan method) using the updated figures from Step 2.
4. Recalculate the cost per capita for each fee category by dividing the results of Step 3 by either the existing service population if the fee is calculated using the existing inventory method, or by the future service population if the fee is calculated using the system plan methodology. Both the existing and future service populations are identified in the first table of every chapter in this report.

5. Calculate the cost per worker (if applicable) for fee categories that are charged to nonresidential development. The cost per worker is equal to the cost per capita calculated in Step 4 multiplied by 0.31.
6. Update the fee schedule by multiplying the cost per capita and the cost per worker calculated in Step 5 by the density factors listed in Table 2.2 to determine the base fee for each land use.

To update the park facility fees for inflation, the steps are as follows:

1. For each facility type (land, improvements), identify the percent change in facility value since the last update, based on changes in each inflation index or for each type of land.
2. Modify the value of land acquisition and improvements shown in Table 11.7 by the percent change identified in Step 1.
3. Using Table 11.7 as a guide, recalculate the cost per resident using the adjusted values for land acquisition and improvements calculated in Step 2 for both neighborhood parks and regional parks/open space.
4. Update the fee schedule by multiplying the costs per capita calculated in Step 3 by the density factors listed in Table 2.2 to determine the base fee for each land use. The total fee for a given land use is equal to the cost per capita for land (from step three) multiplied by the occupant density, added to the cost per capita for improvements (also from step three) multiplied by the occupant density. See Table 11.8 for reference.

Once all of the fees have been inflated, multiply the sum of all the fees, per land use, by two percent (2%) to determine the administrative charge. As part of this update the administrative fee is being increased from one percent (1%) to two percent (2%). Future updates to the fee program should review the administrative fee to ensure that it fully covers the cost of administering the fee program.

## Reporting Requirements

The County complies with the annual and five-year reporting requirements of the *Mitigation Fee Act* found in Government Code Sections 66001 and 66006. For facilities to be funded by a combination of public fees and other revenues, identification of the source and amount of these non-fee revenues is essential. Identification of the timing of receipt of other revenues to fund the facilities is also important.

## Programming Revenues and Projects with the CIP

The County maintains a twenty-year Capital Improvements Program (CIP) to plan for future infrastructure needs. The CIP identifies costs and phasing for specific capital projects. The use of the CIP in this manner documents a reasonable relationship between new development and the use of those revenues.

The County may decide to alter the scope of the planned projects or to substitute new projects as long as those new projects continue to represent an expansion of the County's facilities. If the total cost of facilities varies from the total cost used as a basis for the fees, the County should consider revising the fees accordingly.

# 17. Mitigation Fee Act Findings

---

Public facilities fees are one-time fees typically paid when a building permit is issued and imposed on development projects by local agencies responsible for regulating land use (cities and counties). To guide the widespread imposition of public facilities fees the State Legislature adopted the *Mitigation Fee Act* (the *Act*) with Assembly Bill 1600 in 1987 and subsequent amendments. The *Act*, contained in *California Government Code* Sections 66000 through 66025, establishes requirements on local agencies for the imposition and administration of fee programs. The *Act* requires local agencies to document five findings when adopting a fee.

The five statutory findings required for adoption of the maximum justified public facilities fees documented in this report are presented in this chapter and supported in detail by the report that follows. All statutory references are to the *Act*.

## Purpose of Fee

- ♦ *Identify the purpose of the fee (§66001(a)(1) of the Act).*

Development impact fees are designed to ensure that new development will not burden the existing service population with the cost of facilities required to accommodate growth. The purpose of the fees proposed by this report is to implement this policy by providing a funding source from new development for capital improvements to serve that development. The fees advance a legitimate County interest by enabling the County to provide services to new development.

## Use of Fee Revenues

- ♦ *Identify the use to which the fees will be put. If the use is financing facilities, the facilities shall be identified. That identification may, but need not, be made by reference to a capital improvement plan as specified in §65403 or §66002, may be made in applicable general or specific plan requirements, or may be made in other public documents that identify the facilities for which the fees are charged (§66001(a)(2) of the Act).*

Fees proposed in this report, if enacted by the County, would be used to fund expanded facilities to serve new development. Facilities funded by these fees are designated to be located within the County. Fees addressed in this report have been identified by the County to be restricted to funding the following facility categories: animal services, behavioral health, criminal justice, detention, fire protection, emergency services, health, libraries, other county, regional and neighborhood parks, sheriff, and information technology.

## Benefit Relationship

- ♦ *Determine the reasonable relationship between the fees' use and the type of development project on which the fees are imposed (§66001(a)(3) of the Act).*

We expect that the County will restrict fee revenue to the acquisition of land, construction of facilities and buildings, and purchase of related equipment, furnishings, and vehicles used to serve new development. Facilities funded by the fees are expected to provide a countywide network of facilities accessible to the additional residents and workers associated with new development. Under *the Act*, fees are not intended to fund planned facilities needed to correct existing deficiencies. Thus, a reasonable relationship can be shown between the use of fee revenue and the new development residential and non-residential use classifications that will pay the fees.

## Burden Relationship

- ◆ *Determine the reasonable relationship between the need for the public facilities and the types of development on which the fees are imposed (§66001(a)(4) of the Act).*

Facilities need is based on a facility standard that represents the demand generated by new development for those facilities. For each facility category, demand is measured by a single facility standard that can be applied across land use types to ensure a reasonable relationship to the type of development. For most facility categories service population standards are calculated based upon the number of residents associated with residential development and the number of workers associated with non-residential development. To calculate a single, per capita standard, one worker is weighted less than one resident based on an analysis of the relative use demand between residential and non-residential development.

The standards used to identify growth needs are also used to determine if planned facilities will partially serve the existing service population by correcting existing deficiencies. This approach ensures that new development will only be responsible for its fair share of planned facilities, and that the fees will not unfairly burden new development with the cost of facilities associated with serving the existing service population.

*Chapter 2, Growth Forecasts and Unit Cost Estimates* provides a description of how service population and growth forecasts are calculated. Facility standards are described in the *Facility Standards* sections of each facility category chapter.

## Proportionality

- ◆ *Determine how there is a reasonable relationship between the fees amount and the cost of the facilities or portion of the facilities attributable to the development on which the fee is imposed (§66001(b) of the Act).*

The reasonable relationship between each facilities fee for a specific new development project and the cost of the facilities attributable to that project is based on the estimated new development growth the project will accommodate. Fees for a specific project are based on the project's size. Larger new development projects can result in a higher service population resulting in higher fee revenue than smaller projects in the same land use classification. Thus, the fees ensure a reasonable relationship between a specific new development project and the cost of the facilities attributable to that project.

See *Chapter 2, Growth Forecasts and Unit Cost Estimates*, or the *Service Population* section in each facility category chapter for a description of how service populations is determined for different types of land uses. See the *Fee Schedule* section of each facility category chapter for a presentation of the proposed facilities fees.
