

# YOU'RE THE SOLUTION TO THE POLLUTION

**WWW.STANISLAUSRECYCLES.ORG**

**PARTICIPATE IN OUR ONLINE SURVEY AT  
<https://www.stanislausrecycles.org/survey>**

**Don't worry darling,  
it's just *soap*!**

It's not just soap from washing your car that goes down the storm drain. It's also the oils and dirt from your car that go directly into the drain and run right into our lakes and rivers, untreated, harming the fish and our water.

***So, wash your car at a car wash,  
on the lawn or someplace where  
it can soak into the ground.***

**All those years of *Doggie*  
Obedience School finally paid off.**

Always, always, always scoop your dog's poop. If left on the ground, the doo doo could end up on someone's shoe. Even worse, it carries disgusting bacteria that could wash into our rivers, streams and water supply.

***Since Fido can't...do your part.  
Carry a bag and pick up the poop.***

**Mitch finally realized what  
to do with all that *motor oil*.**

Pouring used motor oil down a storm drain is just plain yucky! It dirties our rivers, streams and water supply.

***Recycle your used oil and  
fix those nasty leaks.***

**My lawn is *greener*  
than your lawn.**

The pesticides and fertilizers we use to keep our yards perfect also find their way into the water we drink, swim in and the fish we eat. Everything that goes into our storm drains and groundwater goes untreated, straight into our rivers and streams.

***So, follow the instructions on your  
garden sprays and lawn fertilizer.***
