Good afternoon Stanislaus County Community Planning Commission Board of Supervisors.
I am writing to let you know of my concerns of the application under review to have a Compost facility be built in our area. The Machado & sons Construction Inc. have applied with Stanislaus County to Install an Industrial Composting Facility in a densely populated agricultural zoned area at 1236 West Main Street. Crows Landing, California 95313.

Dangerous for our Mt. View Community!!!

I believe this Compost facility would be danger to not only my family but our neighborhood, our Middle school and our community children that attend Mt. View Middle school @ 10001 Crows Landing Road Crows Landing, California 95313. **Not only having horrible smells from all the "GREEN WASTE", leftover food/meats that might hinder their ability to learn, concentrate on class work, but also may have a life altering affect on the health of our children.** This facility would be just be a few homes/ fields away from our school children. Just thinking of all the traffic from the trucks on the roads delivering from Turlock Scavenger Company's, running empty, the noise, the exhaust fumes, the smells is more than a concern its down right scary to think that you would even consider putting a compost facility this close. we not only have a school, we have our homes, restaurants, a feed store and even a ball park where our community members play ball several days a week. we also have our Mt. View Grange hall where we have gatherings to celebrate, have meetings.

My family has been in this wonderful community since 1927 at 10354 Crows landing road Crows Landing, California 95313 where my father in-law started his family dairy and we still to this day live on the ranch.

This in not some where out in a desolate area where this facility should be built. They are wanting to build this industrial compost facility in our community where we have several generations of families that are still raising not only their children but their grand children, great grand children.

All nearby farms with residence in all directions will suffer greatly from this selfish decision to place an industrial facility in our community where it DOES NOT BELONG. I have read these compost facilities catch on fire and its a huge fire and last for several days to weeks. I just don't think this is the best place for this type of haziest waste facility to be built in our neighborhood, our community.

Thank you for your time and consideration.
