SPECIAL INSPECTION AND TESTING AGREEMENT

The CBC Chapter 17, Section 1704.1 requires that in addition to inspections required by Section 109, Appendix Chapter 1 "Special Inspections and Testing" be made when specific types of construction occur unless exempted by Section 1704.4.

Special inspection and testing shall meet the minimum requirements of CBC, Section 1704. Special inspections are to be performed on a continuous basis, meaning that the special inspector is on site in the general area at all times observing the work requiring special inspection. Periodic inspections if any, must have prior approval by the building official based on a separate written plan reviewed and approved by the building official and the project engineer or architect.

BEFORE A PERMIT CAN BE ISSUED:

1. The owner, engineer, or architect acting as the owner's agent, shall complete this agreement and the attached "Special Inspection and Test Schedule" (FS2) by indicating the necessary inspections as required by the CBC, Section 1705.
2. Each inspection/testing agency, special inspector shall be approved by the Building Permits Division prior to performing any duties. Each agency or special inspector shall submit their/his/her qualifications to the Building Permits Division for review and approval.
3. Each special inspector involved with the project shall be able to provide an approved identification, when performing the function of a special inspector.
4. A pre-construction conference with the parties involved will be held to review the special inspection requirements, procedures and sign the "Special Inspection and Testing Agreement" (FS3). The pre-conference may be waived when determined by the building official.
5. The contractor is responsible for notification to the Special Inspector or agency regarding individual inspections on the attached Schedule (FS2) and as noted on the Building Permits Division approved plans. Adequate notice shall be given to allow the special inspector to become familiar with the project.
6. Duties of the special inspector are:
 - a) Observe the work for conformance with the Building Permits Division approved (stamped) design drawings, specifications.
 - b) The special inspector shall furnish inspection reports as required and all discrepancies shall be brought to the immediate attention of the contractor for correction, then, if uncorrected, to the proper design authority and the building official.
 - c) The special inspector shall furnish weekly inspection reports to the building official, the engineer or architect of record and other designated persons.

Reports shall include the following:

- The date of the inspection or test.
- The name of the agency providing the inspection services.
- The name, address, and building permit number of the project.
- The signature and typed or printed name of the person making the inspection or test.
- Describe inspections and tests made with applicable locations.
- List all non-conforming items.
- Indicate how non-conforming items were resolved or indicate unresolved items.
- Itemize changes authorized by the architect, engineer and building official if not included in the non-conforming items.

- d) The special inspector shall provide a daily hand written report in a format acceptable to the Building Permits Division to remain on the job site with the contractor for review by the Building Permits Division's inspector. Contents shall be as stated in item c) above.
- e) The special inspector shall submit a final signed report stating whether the work requiring special inspection was to the best of his/her knowledge, in conformance with approved plans and specifications and the applicable workmanship provision of the CBC. The report must be received and approved prior to the issuance of the required Certificate of Occupancy.

7. Building Permits Division's responsibilities are to:

- a) Approve Special Inspectors

The Building Permits Division shall approve all special inspectors and special inspection requirements.

- b) Monitor special inspections

The building inspector shall monitor special inspections and the performance of the special inspector. His/her approval must be obtained prior to placement of concrete or other similar activities in addition to the special inspector.

- c) Issue Certificate of Occupancy

The Building Permits Division may issue a Certificate of Occupancy after all special inspection reports, including the final report, have been submitted and accepted.

ACKNOWLEDGMENTS

I have read and agree to comply with the terms of this agreement.
