

## CONSTRUCTION WASTE DISPOSAL AND RECYCLING

### CONSTRUCTION WASTE MANAGEMENT

Construction waste diversion reduces the burden on landfills and promotes the conservation or recycling of existing materials.

There are two recommended methods of compliance that will meet the minimum 65% reduction of construction and demolition waste requirements set forth by the California Green Code. Either of the two options listed below are recommended in order to comply with recycling and/or salvage, for reuse, of the non-hazardous construction and demolition waste that may occur on the site.

### *CONSTRUCTION WASTE MANAGEMENT PLAN (ATTACHMENT 1)*

Submit a construction waste management plan in conformance with Items 1 through 5. The construction waste management plan shall be updated as necessary and shall be available during construction for examination by the enforcing agency.

1. Identify the construction and demolition waste materials to be diverted from disposal by recycling, reuse on the project or salvage for future use or sale.
2. Specify if construction and demolition waste materials will be sorted on-site (source separated) or bulk mixed (single stream).
3. Identify diversion facilities where the construction and demolition waste material collected will be taken.
4. Identify construction methods employed to reduce the amount of construction and demolition waste generated.
5. Specify that the amount of construction and demolition waste materials diverted shall be calculated by weight or volume, but not by both.

### WASTE MANAGEMENT COMPANY

Utilize a waste management company within Stanislaus County that is recognized and approved by the State of California which can provide verifiable documentation that the percentage of construction and demolition waste material diverted from the landfill complies with the "Construction Waste Management" section above. Note: The owner or contractor may make the determination if the construction and demolition waste materials will be diverted by a waste management company.

*Please see reverse side for a list of Stanislaus County approved facilities*

### WOOD & LUMBER

Bertolotti Transfer & Recycling Center  
231 Flamingo Dr., Modesto, CA 95358
