

ST. FRANCIS AVENUE OVER MID MAIN CANAL BRIDGE REPLACEMENT PROJECT

Project Manager
Sarah Collins
collinss@stancounty.com

Funding Source(S)
Highway Bridge Program

Project Cost
\$3,035,000

About the Project

The project consists of removing and replacing the existing St. Francis Ave 2-lane bridge with a standard 2-lane bridge with a double cell box culvert. The new structure will meet current roadway and structure standards to improve public safety with measures such as providing more space for both large and small vehicles to occupy the bridge simultaneously, increasing the structural capacity, and constructing crash tested barriers on the bridge.

Project Benefits

- Traffic Safety
- Traffic Flow

What to Expect During Construction

- Traffic Delays
- Bridge Closure
- Noise

Location:

Saint Francis Avenue over Modesto Irrigation District Main Canal, 0.1 miles west of McHenry Avenue

Project No: 9590

Hours

Monday - Friday
7:00 am - 5:00 pm
